Subject: SBI Update Briefings for House/Senate Homeland

Good Morning Gentlemen,

House and Senate Homeland staff have requested that CBP come up and provide briefings next week to update them on the latest with SBInet.

I anticipate the briefings will primarily focus on the latest delays to the timeline and the Secretary's call for a "review" of the program, however they will likely also ask questions about BP's early "familiarization" with the system (i.e., how it will work, whether there will be a mechanism to provide feedback on the system or if it will be strictly informal), operational testing, and possibly other issues that BP would want to chime in on.

As of right now, we are looking at 10:30am-12:00pm next Tuesday, February 2, to meet with Senate Homeland. I am trying to arrange the House Homeland briefing for either Tuesday afternoon or possibly sometime on Thursday.

Would you or someone from your group be available to participate in these briefings next week?

Thank you!

Subject: STATUS SLIDES

: Here are the status slides you asked for, plus additional slides for my bi-weekly update. One note on the OIC slide. There is some minor disagreement over the date that construction will actually be completed. I've given you two slides showing the differing opinions. I personally think the Oct date is more realistic, occurred that is we say Oct we will need to update congress as this is a change.

I'm headed out to a meeting with MTCSC Corporation. I do not plan on coming back to the office this afternoon, but will be available by cell phone if you have any questions on this package.

Thanks

(b)(6);(b)(7)(C)

In one of the breaks that we had yesterday in dealing with all the activities surrounding the 12/25 incident, Haiti, and another hot button item, the Secretary and I had a chance to very briefly discuss SBInet, the 60 Minutes piece, and path forward. She is of the same opinion as we are: the 60 Minutes piece was a lot less negative than what we had anticipated and she also thought that Boeing took the brunt of the piece. She also stated that the purpose of the memo that went out with her directing the "review" of SBInet was in anticipation of a more negative piece. But basically she agrees with the options paper that we put forth before the holidays. She did not specifically identify option 2 as her preference but as she lined out her recollection of the memo and it fits right along with Option 2. She noted that she had "spoken to Congress" about this and that they were not surprised and supportive. I did not ask how this communication was done, formally or informally. Given the timeline from when we sent the paper forth I would guess that it was a verbal and informal.

This being the case we need to look at redesigning our thought process as to technology capability requirements (i.e, detection, deterrence, identification, classify, etc.. or mix of) that we would be looking to get resourced under this option. Exercising this option or something similar to it would mean that we would be weighting our resource procurement efforts and requirements towards "commodity purchases" of technology versus "system development". Not that we would stop the systems development completely (block one). I would ask that Border Patrol revisit our technology requirements against this new information.

Keep me apprised.

Sent: Sun Jan 31 21:36:17 2010

Subject:

Why was the department wide assessment requested?

This fall, due to ongoing concerns about SBInet, the Secretary directed the Acting Commissioner of Customs and Border Protection to evaluate its implementation. As his analysis uncovered unacceptable delays, a department-wide reassessment was ordered to consider options that may more efficiently, effectively and economically meet border security needs.

Delays are caused by CBPs commitment to review the quality and effectiveness of the system. As previously reported, the program faced a number of technical issues identified with the system resulting from the testing performed over the last year. Although none of the issues were considered to be "show-stoppers," CBP did feel it prudent to address each of them very deliberatively and comprehensively. As a result, time was invested to do full-engineering analysis, design corrections, and fully test the corrections. Most of this is complete, but it has taken time.

(b) (7)(E)

The detailed test planning will need to accommodate the system corrections, which is a comprehensive and time-consuming effort.

CBP chose specifically NOT to take excessive short cuts, which might have made the near-term schedule appear better but would likely have created new delays in the future.

To mitigate the delays, CBP is now working with Boeing to use the system "as is" over the next few months, even before extensive testing is performed. In that way, CBP can get most of the operational benefit if the schedule had been maintained, while still protecting the government equities to ensure the government doesnt fully accept the system until it is ready.

How long with the assessment last?

DHS is just beginning to set up the parameters of the assessment. However, it is expected that there will be both a near term and long term piece to the assessment. The near term assessment will be based on the particular needs and urgency of border security and whether SBInet can fill those requirements. A longer term assessment will be based on what DHS learns from the testing of SBInet initial deployments.

What will be the outcome of the assessment?

The assessment will focus immediately on whether or not SBInet can be done. This program

has experienced a tremendous amount of delays. The assessment will determine if the government is prepared to accept any more delays. And given an understanding or expectation of the availability of this technology, what decisions need to be made to deal with the urgency of technology in support of border security.

Does the reassessment put the program at risk?

After the reassessment, DHS will make a future acquisition decision on the program, which could include a recompete of the contract, extending the contract or going down an entirely different path.

Who will be involved in the assessment?

The assessment will include all parts of DHS including the CBP Secure Border Initiative officee, the Science and Technology Directorate, the Chief Acquisition Officer's office, the CBP chief information officer and others.

What does the assessment mean for SBInet current operations?

SBInet will maintain the current plan which is to deploy the first two production systems of SBInet. Construction of the initial deployments of SBInet in deployment, (b) (7)(E) is built and the second deployment of SBInet, (b) (7)(E) is built and is currently undergoing individual component testing in preparation for systems acceptance testing. Boeing will not start any new work on the program.

In the meantime while DHS reevaluates SBInet, CBP is working with Boeing to let border patrol agents begin using the deployed technology.

Date: Thursday, January 07, 2010 3:23:35 PM

(b)(6);(b)(7)(C)

I had some initial discussions with (b)(6):(b)(7)(C) from IDA. He supports DoD DOT&E. They are willing to support us and/or Border Patrol in providing some assistance (consulting services) re: Operational Test Planning and Execution. I would like to provide IDA an SBInet 101 and SBInet OT&E 101 brief in the nearterm.

After that brief, I believe we can come to some agreement as to what level of support IDA can provide.

Pls see the email below and let me know if any of those windows work.

Subject: CBP Status of ARRA Projects due COB Thursday, 01/08/10 (for Week 46)

Importance: High

Good morning, ARRA Program Managers and key contacts -

Please update the attached Excel file for week 46 (using week 45's final report, now a draft for week 46), and submit your input for the "Status of ARRA Projects" to (b)(6);(b)(7)(C) not later than COB Thursday, 01/08.

As always:

- Please highlight in yellow any cells with changes.
- · Please use this exact version of the report.
- Please return this report in an email separate from the Weekly Update report (kindly do not submit both in one email).

As a reminder, please include all projects that have already been obligated, as well as anything we expect to obligate. If any projects originally scheduled have been pushed back, please note that and continue to include them on the spreadsheet.

If you have any questions, please contact us at (b)(6); (b)(7)(C) Thank you.

For the latest information on CBP ARRA efforts, please visit the CBP **ARRA Working Group** KMS site at:

Importance: High

Certainly!! We are now in the planning stage for the FY2010 project list. Have Chief representative give me a call or e-mail with the list of products he wants assessed and we will put them

on the list. I have already done this with earlier request I got from CBP (they wanted by (7)(E)). By the way, if it's (b) (7)(E) we may already have the category on the list and just need to focus the technical agent on the right products.

SUB [DCMA Monthly Executive Report- December 2009]

CONTRACT INFORMATION:

1. Prime Contract: HSB1006D01353

2. Prime Contractor: Boeing - Integrated Defense Systems

- **3. Work Scope:** This contract is broken into individual Task Orders based on the various sectors and type of work to be performed.
- **4. Program Period of Performance:** Period of performance currently thru September 2010 with two one year options remaining.

Program Status

1. EVMS – DCMA has yet to close any additional EVM CARs due the fact that Boeing has either not been able to meet the intent of the subject CARs or to meet the required criteria as stated in each CAR. DCMA and Boeing have segregated the EVM CARs into three groups to help facilitate their closure.

DCMA is in the process of finalizing their 2010 EVMS (b) (7)(E) for the facility. DCMA hopes that this performed jointly in a more teaming effort.

- 2. Engineering In DCMA's assessment, the modification of a COTs item obviously cause one to question whether or not it remains an actual COTs item in name only. One would expect the vender to show specifically how it is readily available for verification purposes.
- 3. Quality Assurance 94% of the Tower site GMIPs are complete and 91% of the C2 facility GMIPs are complete. See QA report below for list of those outstanding.

DCMA (b) (7)(E) has been turned on through an LOD from DCMA Huntsville to support the (b) (7)(E) eployment on NBP.

Quality Assurance - Software - DCMA software quality foresees Boeing should implement a process for Configuration Management control on the firmware and test tools for each item within the SBInet Program.

DCMA is anticipating that Boeing (Huntsville) will be updating the (b) (7)(E)

STO

The cumulative EVM data for the STO Task Order indicates that cost and schedule performance are both very close to plan and budget with relatively small negative cost and schedule variances. A positive cost variance is forecast at completion, although it is offset by \$ (b)(3) in potential cost impacts that appear to be incurred already incurred or necessary. The level of accounting and charging issues, especially for Major Suppliers, is considered a significant EVMS system issue, although Boeing is now taking effective corrective action to correct them. The numerous technical issues and schedule problems would be expected to become evident in the EV data in the CPR. This is not shown in the cumulative cost data. However the current period does show the impacts of the technical problems and their related schedule impacts with a .76 CPI based on \$ (b)(3) in BCWP costing (b)(3) to accomplish. The large current period negative cost variances in System Qualification Test, Segment Design and Integration and CONOPS Integration give an indication of the future expected negative cost performance for this Task Order. This indicates that the cumulative cost performance should worsen in the next few reporting periods.

The majority use of LOE and the period of performance defined rather than fixed work scope based Task Orders significantly reduce the effectiveness of EVMS as a management tool for this Task Order. The question of extending the period of performance to complete the planned work for the task order or how much work initially planned to be completed during this Task Order's period of performance that will be delayed and move into the follow on STO Task Order remains a major constraint on developing a DCMA Independent EAC. Either the extended period of performance and additional months of manning costs or the shortfall in work accomplished impacting the long term program through follow on Task Orders are the potential cost drivers. The current spend rate and cumulative costs to date should drive total incurred costs for this STO Task Order with the current Period of Performance to the \$

(b)(3) BAC. If the Period of Performance for this Task Order is significantly extended, the EAC would be significantly increased.

For STO, the in place Boeing and Supplier personnel are likely to maintain a relatively high spend rate as the work to be accomplished takes longer than planned to perform. This is expected to be the fundamental cost growth driver for 2010.

ADTO

Both the cumulative and current period ADTO EVMS data indicate a significant level of cost growth as would be expected from the known technical issues and their associated schedule impacts. The cumulative CPI is .89. The current period cost performance with ACWP of \$ (b)(3) and claimed BCWP of only (b)(3) generating a current period CPI of less than .40. Allowing for \$ (b)(3) of this being due to a DRS material transfer expense in the current period with the EV credit having been taken in the prior period, the resulting calculated CPI of .57 is still a red flag for future cost performance on the ADTO Task Order. The CPR Format 5 prepared by Boeing gives improving descriptions of the pattern of much higher than planned efforts and longer periods of time being needed to accomplish tasks and their cost impacts. Although more detail to support Format 5 variances and forecasts EACs, especially specific technical issues, and the estimates of their cost impacts are needed. These trends are expected to continue.

The possible cost impacts of system technical performance risks are very large. With the majority of the budget for integration and test activities already claimed as BCWP, the additional testing and integration

costs for both delays and more extensive than initially planned efforts are likely to go directly into negative cost variances. The cumulative SPI is driven by completed construction and purchased hardware costs. The current period and expected future CPI performance is driven by additional testing and Integration costs.

The Program Office indicated that they intend to extend the period of performance for the ADTO effort to accomplish the planned tasks rather than transfer work to a follow on Task Order. Supplier revisions of staffing levels are in process. This program extension is being defined in numerous technical planning and scheduling activities and is expected to be a major cost growth driver. The definition of the extended period of performance for this Task Order also complicates the development of a DCMA independent EAC. Based on additional delays being defined since the CPR was prepared the worst case EAC is likely to be optimistic to accomplish the major milestones originally planned for the Subject ADTO Task Order.

DTO

The DTO execution review held on 10 December 2009 was successfully accomplished. For the current period, the Management and Integration control account claimed two months of budget work credit but only one month of actual costs for a false positive cost variance of \$ (b)(3) The Project and Sector Design control account had a negative cost variance of (b)(3) due to continued work on after exhausting the planned budget for this objective. Slippage of the FONSI date, continued work on the RAT tower design and additional effort to achieve DRR for are cost drivers. It was planned to have shifted the focus of work to the (b) (7)(E) projects by this time. Currently this effort appears to have much better expected cost performance over the next few months than ADTO and STO detailed above. The independent DCMA EAC is for this task order to complete near the \$ (b)(3) BAC as impacts of technical problems and delays on STO and ADTO are likely to impact this effort enough to erode the cumulative and projected positive cost variances.

CARs for Earned Value Management issues

- 1. Total CARs issued for Earned Value Management issues =18
- 2. Total CARs closed for Earned Value Management issues =1
- 3. Total CARs for Earned Value Management issues currently open =17
- 4. Average time to CAR closure for Earned Value Management issues = this is a long term issue. The EVMS implementation by Boeing on SBInet is still considered to require considerable improvement to be fully compliant to the EIA ANSI 748 EVMS Criteria. Boeing is invited to submit effective corrective action plans for the outstanding CARS.

The majority of the CARs fall into three groups. Some of the CARs appear to be dependent or at least impacted by improvements to the Boeing IDS EVMS System description being done under the EVMS Center managed Corporate level corrective action plan and may be paced by issuance of revision D of this Document. Work Scope issues that cite criteria 1 and 3 and Critical Path issues that cite criteria 6 are the other major areas needing to be addressed.

For the Critical Path CARs, I think Boeing and the Program office need to agree as to what are the relevant Critical Path requirements for this program; given the use of 1 year or effectively shorter Task Orders on both STO Development and Deployment ADTO efforts. Is the ability to do Critical Path analysis for specific milestones, as Boeing now does, adequate and or the limit of what can be done

under the contract structure? I think we need some sort of requirements definition under the limits of the contract structure to close out the critical path CARs.

For the work break down structure CARs, this will probably be paced by seeing how the work effort is managed by intensive program surveillance and by seeing a STO IBR with a majority of the work covered by Discrete EV methodology.

These 3 major areas of concern will probably be the pacing items for CAR closure.

DCMA Audits In Work

• Boeing Internal Audits (to be completed in Jan 10)

Boeing Internal Audits due in Jan 09

Product Realization

Boeing Internal Audits Completed in Dec 09

- Playas Developmental Test
 - 3 Major Findings
 - 4 Minor Findings
 - 4 Observations
- Lab Life Cycle Process and Lab Operating Process Minor Finding (P & M)

There is currently no objective evidence that life cycle and a Lab operations

process exist. These processes can provide a specific life cycle analysis of the Playas Lab.

(See attached procedure) The Laboratory Operations Process would identify the necessary support requirements and resources as well as providing data collection and validation.

• <u>Personnel Training – Minor Finding (P)</u>

<u>I have not seen a Lab Manager Accreditation course for Playas</u>. This would be required 30 days before assuming Lab Manager Duties. Technical personnel have specific training in My Learning, but there is not a developed training matrix for required courses and certifications that are applicable to Playas.

• Processes and Procedures – Major Finding (M)

There is no evidence of a Lab Operating Plan. This plan would be tailored to the specific Playas Lab functions and tasks. Here is where the Security, Configuration and data management, SHEA, Audits, Property Management, and Lab costs would be identified.

• The Lab Manager – Major Finding (M)

This person is responsible for Lab Management Accreditation Course, Plans, Processes, and Procedures to assure compliance with all Boeing and IDS common procedures. The lack of a lab operating plan makes it difficult to comply with this requirement.

• Site Lab Focal – Minor Finding (P)

There is a site Lab Focal at Playas. There is not a clear direction for Site Lab Focal responsibilities due to the lack of the Lab Operating Plan. Responsibilities to include training, processes and procedures, property management, and review of costs and life cycle analysis.

• Quality – Minor Finding (P)

Site Quality responsibilities are not defined due to the lack of an operating plan. Training matrix should not be the responsibility of Playas Quality. This is the responsibility of performing site personnel. <u>Playas Quality should be conducting audits to verify</u> compliance to all applicable processes and procedures.

• Security and Shea Requirements - Observation

STOP training and STOP audits?

This is at the discretion of the Site Lab Manager. This may not be needed in Playas. This would be in the Lab Operating plan.

• Rework and Repairs – Major Finding

Work performed on the Towers and work performed on the bench

Ref. D2-5378-1 PROCEDURE PS1054 ESD work station certification

The two work station are not certified and there is evidence that a been opened up to install (b) (7)(E)

Government property tag # (b) (7)(E)

PN (b) (7)(E)

(b) (7)(E)

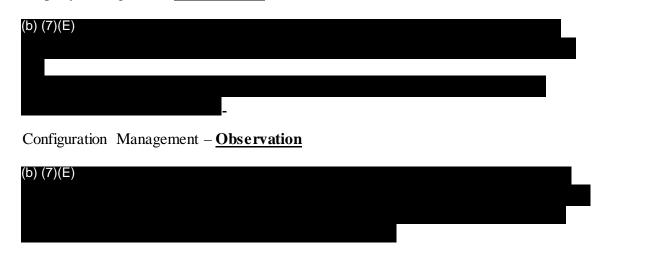

• Lab Management Best Practices - Observation

I have found evidence that Lab Management Best Practices are being used in Playas **Areas of improvement:**

Self – audits tailored to lab operations

Check personnel training records before proceeding with a test.

• Property Management - **Observation**

Property Administration
(b)(6);(b)(7)(C) DCMA Huntsville, (b)(6);(b)(7)(C)
Email: (b)(6);(b)(7)(C)

DCMA Government Property Administrators (GPA) has been trying since 28 February 2008 to integrate their support on the SBInet program and have not been able to do so for a multitude of reasons. December presented the latest road block when Boeing convinced the ILS COTR that if DCMA was to be utilized as the GPA then it was going to cost the program a lot more money. Boeing said that they would have to hire several more persons to meet DCMA's requirements.

Be assured that DCMA has not and will not levy any additional requirements on Boeing. DCMA was merely trying to validate that Boeing is performing to the FAR clause 52.245-1 2007 for Government Property Management.

FOR OFFICIAL GOVERNMENT USE ONLY

Updates will come regarding this in January.

Called Chief

(b)(6);(b)(7)(C) just called and asked to speak to the Chief about SBInet for about 10-15 minutes today at 5 pm. Any idea what that might be about? Would you want to be here when he talks to her?

Counselor, Office of the Commissioner U.S. Customs and Border Protection (b)(6);(b)(7)(C)

Subject: RE: Coffee with (b)(6);(b)(7)(C)

Date: Monday, January 25, 2010 11:57:07 AM

I am sitting in Tucson in the SWFO office. I know the SBInet personnel down here also have an interest in the coffee with (b)(6); (b)(7)(C). Is their anyway they could dial in or our office could phone them here?

Thanks

Subject: RE: SBInet Study on TI Cost Effectiveness Date: Monday, January 25, 2010 1:47:38 PM

I spoke with and (b)(6):(b)(7)(C) and we think the HSI effort may address the GAO recommendation: "To improve the quality of information available to allocate resources and determine tactical infrastructure's contribution to effective control of the border, we recommend that the Commissioner of CBP conduct a cost-effective evaluation of the impact of tactical infrastructure on effective control of the border."

HSI is drafting a synopsis of their proposed scope of work. I will provide the synopsis to all concerned and follow-up with a meeting between HSI and OBP hopefully this week to ensure we are all on the same page.

Thanks very much,

(b)(6);(b)(7)(C)

Subject: FW: SBInet Study on TI Cost Effectiveness

Hello all,

Please see the email below from (b)(6)(b)(7)(C). The one recommendation in GAO-09-896 (SBI Program IV) was directed to OBP. However, it looks like FM&E is addressing the recommendation. Should this recommendation be transferred to OA/FM&E instead of OBP? Can you please provide some additional details regarding the TI and Technology Impact Study that was initiated? I want to ensure there is no

duplication of efforts here. Thanks.

(b)(6);(b)(7)(C)

(b)(6);(b)(7)(C)

Subject: SBInet Study on TI Cost Effectiveness

I received email from the OBP Branch Chief overseeing TI. He received a call from FM&E informing him that a TI and Technology Impact Study was initiated by SBInet Director (b)(6);(b)(7)(C) Considering that BP had been in consultation with the University of Arizona to conduct our own assessment to fulfill a GAO requirement, we would be very interested in knowing what the objectives of this TI and Tech Impact study are to preclude duplication of effort on our part.

Could you please contact FM&E and/or SBI to obtain more information for us? Our efforts were directed at fulfilling the GAO recommendation referenced in the attached DHS response to GAO. At the time, SBInet directed that recommendation to BP; however, now it appears as if they have taken the lead on it. We will defer to them since our efforts to date have only been to consult with UofA and may not be as far along as SBInet in their efforts to conduct this study.

Thank you.

(b)(6);(b)(7)(C)

Thanks. Here's what I intend to use with the staffers this week.

Please note I had to make lots of changes to format. Titles, for example, had different color and font sizes. Font sizes on several charts were so small as to be illegible—I fixed what I could but some were embedded within graphics.

In the future, please use the format that I use for my briefings. I think you have copies but if not, let me know and I will send an example. It will help save me hours of time reformatting. Thanks.

Sir, attached is an update to the slide deck (b)(6);(b)(7)(C) provided with a schedule. This is still being massaged a bit, that's why it still is in powerpoint graphic versus IMS format.

As for the MSC, proposals are planned to be due on 1 Mar 2010, predicated on the revised RFP being released by 5 Feb.

Thks

SBInet Update

January 29, 2010

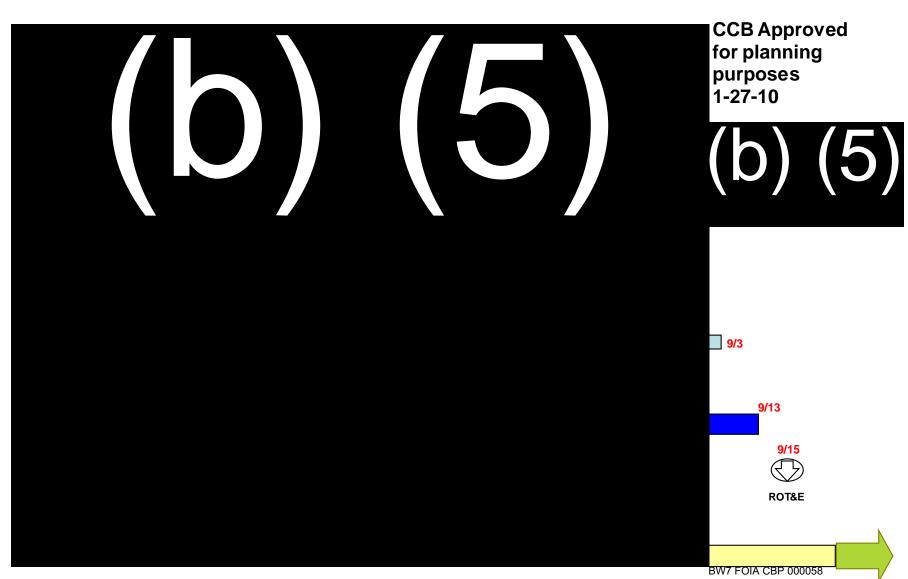

(b) (7)(E) Schedule

For Official Use Only

(b) (7)(E) Field Construction Completed

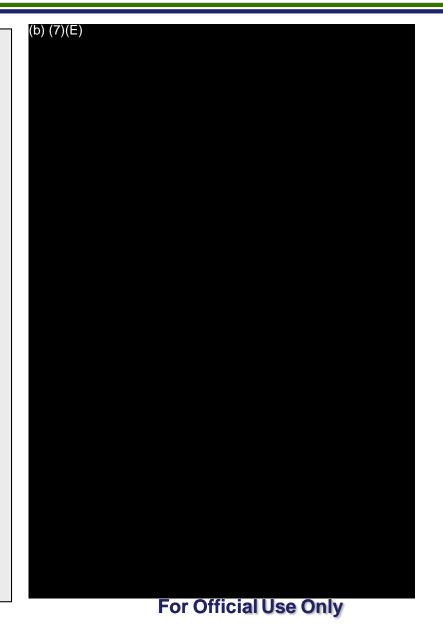

- Construction began on 5/4/09
- Modification of was completed on 5/29/09
- Completed (b) (7)(E) (b) (7)(E)

Issues and Concerns

- Final Acceptance behind schedule due to software changes/fixes
- Test definitions and agreements still unresolved
- A_o still in refinement
 - Working with OID and Boeing to converge on an agreed definition

Look ahead - Next 90 Days

- Complete Field Check-out and Integration
- Installation of (b) (7)(E)
- Installation of upgrades for (b) (7)(E)
- User familiarization starts week of 1 Feb

- Field Check-out & Integration 2nd quarter, FY2010
- IT Infrastructure Installation & Check Out 3rd quarter, FY2010
- System Acceptance Dry Runs 3rd/4th quarter, FY2010
- System Acceptance Test 4th quarter, FY2010
- Test Data Analysis 4th quarter, FY2010
- Operational Test & Evaluation 1st quarter, FY2011
- Schedule dates still under refinement

(b) (7)(E) Status As of 1/27/10

• (b) (7)(E) Accomplishments

- C2 Modular Facility construction began 8/20/09
- Biological Opinion Signed on 12/10/09
- FONSI signed on 12/23/09
- (b) (7)(E) SUP obtained on 1/5/10
- Bureau of Land Management Right of Way obtained on 1/19/10
- Quality Summit held on 1/20/10
- CRR held on 1/21/10
- Start of Construction on 1/25/10 for (b) (7)(E)

Issues and Concerns

- GSA Land Access Site 301
 - Working with FM&E to resolve (ECD 2/28)
- Overall Construction Schedule stretches into Pronghorn Season (working with DOI for possible opportunities to mitigate)
- RAT Towers construction meeting Pronghorn Fawning restriction

Look Ahead - Next 90 days

- Receive land use permits from GSA, Arizona
 State Land Department, and (b) (7)(E)
- Start of Construction for (b) (7)(E)
- IAA with USFWS and National Park Service for conservation measures.

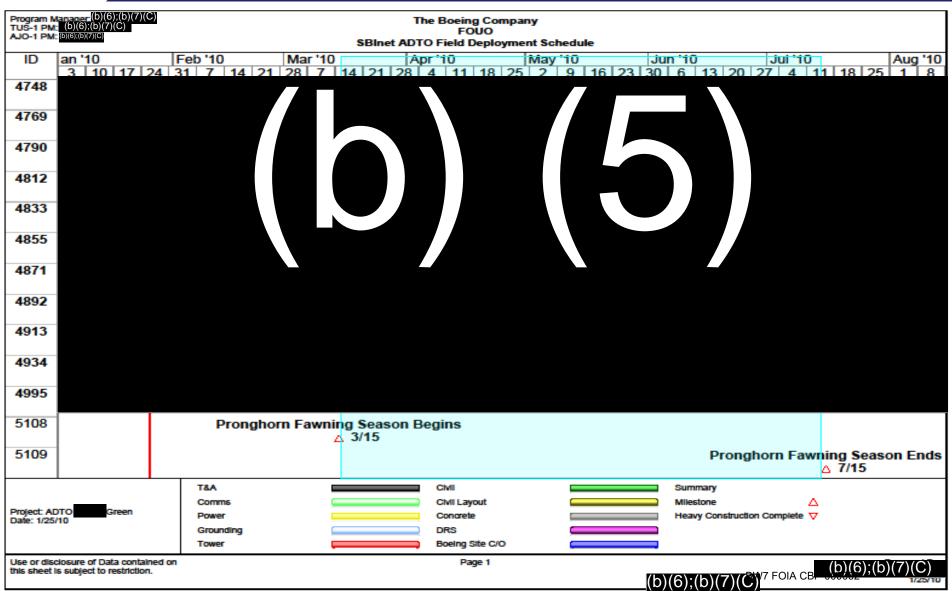

(b) (7)(E)

BW7 FOIA CBP 000061
For Official Use Only

(b) (7)(E) Tower Construction As of 25 Jan

(b) (7)(E) Schedule

- •Field Check-out & Integration 2nd quarter, FY2010
- IT Infrastructure Installation & Check Out 3rd quarter, FY2010
- System Acceptance Dry Runs 4th quarter, FY2010
- System Acceptance Test 1st quarter, FY2011
- Operational Test & Evaluation 1st quarter, FY2011

Departmental Re-Assessment

- Directed by Secretary Napolitano
- Motivated by concern over program delays
 - Need to review program viability
 - Need to identify options for near-term technology deployment to high priority areas
- Near-term focus on consideration of "stand-alone" options that could meet immediate needs
- Long-term focus based on anticipated Acquisition Decision Event 3 (ADE-3)—next year
 - Completion of SBInet Initial Deployments
 - Evaluation of system effectiveness
 - Decision on future deployments of SBInet (if any)
- Detailed assessment plan currently under development

(b) (7)(E) Improvement Effort

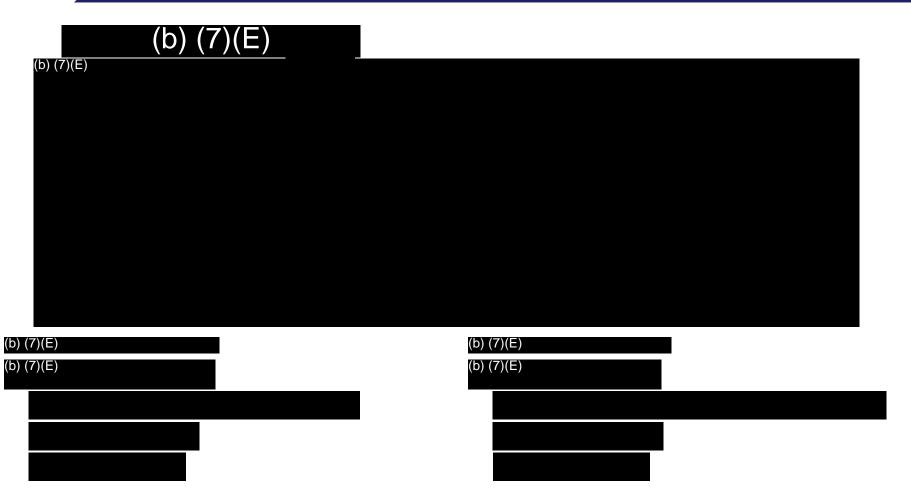

(b) (7)(E)

Effect of Improvements

Does not include (b) (7)(E) improvements

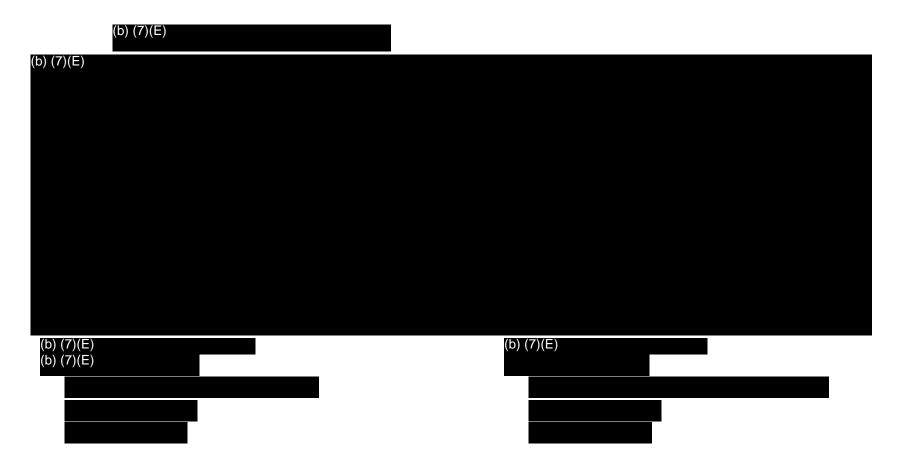

(b) (7)(E)

Effect of Improvements

Does not include (b) (7)(E) improvements

		01/13/10			
		TBD			
		02/26/10			
A delition of Notice		02/04/10			

Additional Notes:

• USACE to begin condemnation proceedings for (b) (7)(E) Government Acceptance for all other sites is scheduled for 3/22/10 with the (b) (7)(E) to be completed in late summer 2010.

- (b) (7)(E)
- Boeing to begin directional boring for (b) (7)(E) utility corridor 02/13/2010.
- Construction is completed for sites (b) (7)(E)
 Sites (b) (7)(E)

 Sector HQ estimated date of completion is 2/3/2010.

Major Issues/Concerns: (b) (7)(E) condemnation proceedings. (b) (7)(E) directional boring and electrical cable construction/wættheoryermitting).

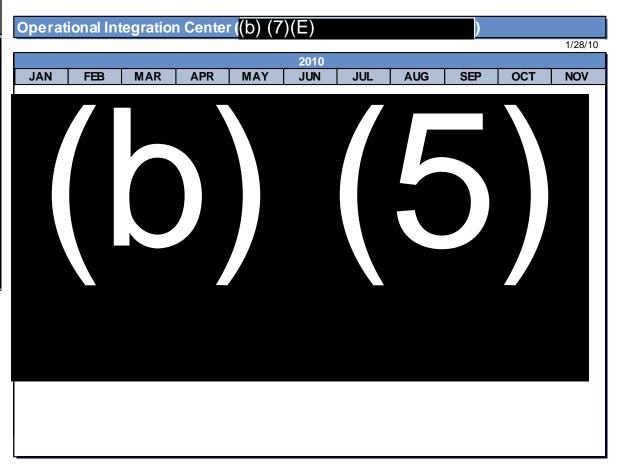

Operational Integration Center (OIC) Status

Task	Duration	Expected Completion
Approval from SECAF	n/a	(b) (5)
Obtain Abatement Permits	3 wks	
Abatement	6 wks	
Construction	30 wks	
Hardware Installation	4 wks	
System Testing	2 wks	
OIC Opening Day	n/a	

- ◆ Recent(b) (7)(E) approval allows project to proceed, albeit later than planned
- Unanticipated requirement for abatement and additional permits has created schedule delays

Notes:

- 1. Construction schedule is a preliminary estimate only! Actual schedule TBD once construction contract awarded. (Expected 2/5)
- 2. Assumption is made that hardware can be installed prior to completion of construction.

Subject: STATUS SLIDES

: Here are the status slides you asked for, plus additional slides for my bi-weekly update. One note on the OIC slide. There is some minor disagreement over the date that construction will actually be completed. I've given you two slides showing the differing opinions. I personally think the Oct date is more realistic, is concerned that is we say Oct we will need to update congress as this is a change.

I'm headed out to a meeting with MTCSC Corporation. I do not plan on coming back to the office this afternoon, but will be available by cell phone if you have any questions on this package.

Thanks

Good morning, ARRA Program Managers and key contacts
Attached for your records, is the final (revised) CBP Status of ARRA Projects that was submitted to DHS for Week 48.

If you have any questions, please contact us at (b)(6);(b)(7)(C). Thank you.

For the latest information on CBP ARRA efforts, please visit the CBP ARRA Working Group KMS site at:

Sir, attached is an update to the slide deck (b)(6);(b)(7)(C) provided with a schedule. This is still being massaged a bit, that's why it still is in powerpoint graphic versus IMS format.

As for the MSC, proposals are planned to be due on 1 Mar 2010, predicated on the revised RFP being released by 5 Feb.

Thks

Subject: STATUS SLIDES

: Here are the status slides you asked for, plus additional slides for my bi-weekly update. One note

on the OIC slide. There is some minor disagreement over the date that construction will actually be completed. I've given you two slides showing the differing opinions. I personally think the Oct date is more realistic, is concerned that is we say Oct we will need to update congress as this is a change.

I'm headed out to a meeting with MTCSC Corporation. I do not plan on coming back to the office this afternoon, but will be available by cell phone if you have any questions on this package.

Thanks

(b) (5)

(b)(6);(b)(7)(C)

The SBI Systems Engineering Directorate and SBI Contracts Branch would like to conduct the JHU/APL Gold (Acquisition Strategy) Review electronically on Monday, January 25, 2010. The JHU/APL Gold Review is for a follow-on IDIQ contract that provides support the SBI Systems Engineering Directorate for technical analysis and research for SBInet testing and evaluation activities. **The current JHU/APL contract ends on February 28, 2010.**

The electronic Gold Review process would be as follows:

1. The advisors will be sent the documentation electronically today. will be provided a hardcopy binder for their review tomorrow.

(b)(6);(b)(7)(C)

- The advisors will have until COB Friday, January 22, 2010 to review and make their recommendation
- 3. AMD will consolidate the inputs and provide them to (b)(6);(b)(7)(C) for a decision on Monday, January 25, 2010.
- 4. AMD has verified the entrance criteria for the Gold Review has been met.

Note: Although the execution of the review board will be done electronically; advisors are encouraged to make phone calls or meet face to face (if necessary); as long as they are able to provide their input to AMD by COB Friday, January 22, 2010.

Please advise if you are agreeable to the recommended sequence for this Gold Review.

Thank you,

MEMORANDUM FOR:

Janet Napolitano

Secretary

FROM:

Acting Commissioner

SUBJECT:

The Future of Secure Border Initiative (SBI) Technology Programs

In several of our past discussions, we have reviewed the status and potential future of the SBInet program. I mentioned the fact that we were reviewing options and would provide you with a concept paper that could frame future discussions and decisions. I have attached the concept paper to this memorandum. In short, it suggests that a more measured and selective approach to the deployment of SBInet might make more sense than a plan to cover the entire Southwest Border with networked systems of multiple fixed sensor towers. I would be pleased to discuss this memo with you at your convenience.

...

Attachment

Commissioner

BACKGROUND PAPER ON THE FUTURE OF SECURE BORDER INITIATIVE (SBI) TECHNOLOGY PROGRAMS

Purpose: To reconsider the baseline planning for SBI technology investments.

Background: Under the baseline, most SBI technology investment is focused on deploying a networked series of sensor towers to cover the entire Southwest Border. The technology element of SBI is known as "SBInet." As described in a December 2006 strategic planning document, SBInet was to provide complete coverage of the Southwest Border by 2011 at a cost of about \$8 billion—roughly \$1.5 billion per year for technology alone. By contrast, SBI funding peaked at about \$1.3 billion in Fiscal Year (FY) 2008, but the lion's share of the funding between 2006 and 2008 was applied to fencing instead of technology. In the FY 2009 SBI Expenditure Plan to Congress, the Department of Homeland Security (DHS) projected SBInet deployment could cover the entire Southwest Border, with the exception of the Border Patrol's (along (b) (7)(E) Sector, by 2014 at a cost of \$6.7 billion. This assumed an aggressive budget profile: near-term funding (through 2010) of about \$500 million a year for technology (additive to funding for tactical infrastructure), ramping to nearly \$1.5 billion per year by the end of the planning period (2014). Additional deployments to cover the remainder of the border were still anticipated, but they would occur after the end of the then-current planning cycle.

What has Changed: Many things have changed substantially since the initiation of SBI and SBInet. Most notably, these include:

- More integrated and comprehensive understanding of the dynamics of border control. At SBI program initiation, we understood that border control came from application of personnel, technology, and tactical infrastructure (including fence). However, we did not have a consensus understanding that the combination of elements, rather than the elements themselves, was the driver for successful border control. SBInet was treated and marketed as if it were the critical component to achieve border control. In fact, in some circles, we essentially treated "border control" and "SBInet deployment" as if they were synonymous. It now makes sense to review the appropriate contribution of SBInet to border control given a more mature understanding of those dynamics.
- Program funding assumptions. As noted above, SBInet was never funded to the level
 contemplated in the December 2006 strategic plan. Even so, the program continued to
 enjoy high priority and support for funding, and funding shortfalls in near-years were
 perceived merely as program deferrals rather than drivers of fundamental change.
 However, current national priorities are creating longer-term budget stresses on SBI, and
 under the current environment a \$6 billion to \$8 billion investment plan (the current SBInet
 plan) deserves a good, hard look.
- Program delays. The program has experienced significant delays and there are many
 contributors to them. For example, funding never reached the levels contemplated in the
 original planning for SBInet. Even if it had, failures in technical and program management
 created delays and reduced confidence in our ability to deliver technology on a dependable
 schedule. Even now, we are experiencing delays in the initial deployment of "SBInet Block
 1," which is the first generation, production system of fixed sensor towers that are

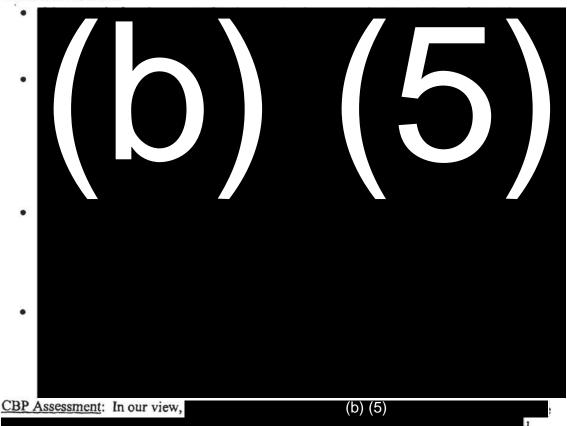

Subject: Background Paper – the Future of SBI Technology Programs Page 2

networked. As recently as this summer, government acceptance of the first deployment (to a (b) (7)(E) area of the border known as (b) (7)(E) was projected by October or November of this year. Emerging technical issues have pushed that out to at least next Spring. As a result, areas of the border that had planned and even depended on technology deployment must wait much longer. It may make sense to reconsider whether we should continue to wait for SBInet Block 1, or whether we should consider accelerated deployment of simpler technology solutions where they apply.

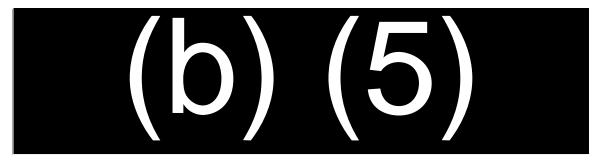

Comprehensive immigration reform. At its initiation, SBI included comprehensive immigration reform (CIR) as a key assumption. The SBI technology strategy was complementary to CIR and its anticipated effectiveness depended on CIR. However, CIR was deferred and the emphasis for border security shifted to enforcement first. While SBInet was always considered a significant contributor to enforcement, its contribution must be reviewed comprehensively as we develop CIR.

Consequences of Changes: SBInet was conceived based on a set of key assumptions, and many of those key assumptions are now invalid. As a result, the conclusions that led to the current SBInet program may no longer be valid. The SBInet program should be adapted better to support the current state of play.

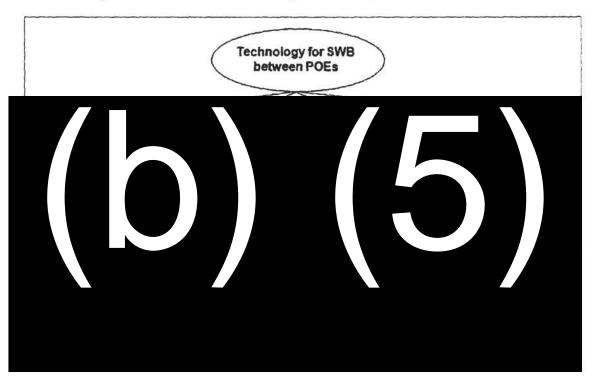

Options: U.S. Customs and Border Protection (CBP) has identified four broad sets of options for the future of SBInet:

Subject: Background Paper – the Future of SBI Technology Programs Page 3

The following chart summarizes the CBP analysis of these options:

<u>Summary</u>: CBP believes SBInet technology planning should adapt in response to a number of significant changes since its inception. In particular, SBInet should treat the system of fixed towers and networks currently under development as an option—but only one option—for cost-effective technology within each defined area of responsibility along the border.

Folks--

Yesterday afternoon, Secretary Napolitano released a statement to 60 Minutes indicating she had directed DHS to

conduct a re-assessment of SBInet in light of continued delays.

We actually didn't have much notice of the statement, although its contents are entirely consistent with discussions we've had before.

I understand the Department has reached out to the highest levels of Boeing to inform them of the statement. Don't know if you'd heard--but if not, wanted to ensure you were aware.

Should be an interesting few days. I love this job.

Team,

The following is the response to our initial OA direction from the boss:

"I think that's pretty solid. You capture it, but I want to try to keep focus on leveraging existing commercial (or government) systems and avoid as much as possible any significant OA developmental activity".

So we are good to go and will be moving out quickly.. By the way I responded back to the boss stating that I would re-emphasize his COTS/GOTS statement by modifying the 2nd near-term execution statement as follows:

"Procure a COTS or GOTS solution, or multiple solutions, for test and evaluation"

Thanks to all who provided comments.

Subject: Initial direction for our OA strategy

Good afternoon Boss,

Had an internal SBI session to discuss the latest OA thoughts bouncing around the 6th/7th floor.

It was a very good session. However, before we move further down a specific path, the group thought that we needed to have some direction from you as to where we are heading so that, ultimately, we could develop a detailed OA strategy.

To that end, I came up with the following (which was chopped through the group) as our initial direction. Please take a look and let me know if we hit the mark. Once I get your tweaks and/or concurrence, I will move out and begin putting meat to the bones.

By the way, I initially had this as a CBP vision – it was scaled back to an SBI vision – but I still think we may want to take this on at the CBP level given the expected CBP reorg.

V/R,
(b)(6),(b)(7))
As the industrial base transitions into designing, developing, and producing open architected technological products SBI is transitioning its acquisition and procurement strategies to take advantage of those open architected technological products to yield modular, interoperable systems that adhere to open standards with published interfaces. This approach significantly increases opportunities for innovation and competition, enables reuse of components and technologies from a broad range of industry partners, facilitates rapid technology insertion, and reduces maintenance constraints.
SBI's Open Architecture Vision
Transform SBI's organization and culture and align resources to adopt and institutionalize open architecture principles and processes in order to deliver more capability to the agents and officers in the field faster and at reduced costs.
Open Architecture Principles (tailored to meet SBI vision):
1. Encourage the building of modular designs and disclosure of data to permit evolutionary designs, technology insertion, competitive innovation, and alternative competitive approaches from multiple qualified sources
2. Encourage competition and collaboration through the identification of alternative solutions and sources.
3. Encourage the building of interoperable applications and web services and ensure secure information exchange using common services (e.g. common time reference), common operator applications (e.g. track manager) and information assurance as intrinsic design elements.
4. Identify reusable application software selected through open competition of 'best of breed' candidates, reviewed by subject matter expert peers and based on data-driven analysis and experimentation to meet operational requirements while improving the overall integration of mission capabilities.

5. Ensure life cycle affordability including system design, development, delivery, and support while mitigating obsolescence by exploiting the Rapid Capability Insertion Process.
Near-term Strategy:
Procure an open architected Commercial Off the Shelf (COTS) Common Operational Picture (COP) as a SBI commodity buy that could replace, or begin to replace, the current SBInet Block 1 COP and be used as the next generation COP to meet existing and future SBInet requirements as well as other SBI project requirements.
Near-term Execution:
Develop an RFP using special contract requirements that describe the use of open software and other key data for use by contractors in bidding on this new procurement for which open-architecture compliance is a requirement.
Procure a solution, or multiple solutions, for test and evaluation

Subject: Initial direction for our OA strategy

Good afternoon Boss,

Had an internal SBI session to discuss the latest OA thoughts bouncing around the $6^{th}/7^{th}$ floor.

It was a very good session. However, before we move further down a specific path, the group thought that we needed to have some direction from you as to where we are heading so that, ultimately, we could develop a detailed OA strategy.

To that end, I came up with the following (which was chopped through the group) as our initial direction. Please take a look and let me know if we hit the mark. Once I get your tweaks and/or concurrence, I will move out and begin putting meat to the bones.

By the way, I initially had this as a CBP vision – it was scaled back to an SBI vision – but I still think we may want to take this on at the CBP level given the expected CBP reorg.

As the industrial base transitions into designing, developing, and producing open architected technological products, SBI is transitioning its acquisition and procurement strategies to take advantage of those open architected technological products to yield modular, interoperable systems that adhere to open standards with published interfaces. This approach significantly increases opportunities for innovation and competition, enables reuse of components and technologies from a broad range of industry partners, facilitates rapid technology insertion, and reduces maintenance constraints.

SBI's Open Architecture Vision

Transform SBI's organization and culture and align resources to adopt and institutionalize open architecture principles and processes in order to deliver more capability to the agents and officers in the field faster and at reduced costs.

Open Architecture Principles (tailored to meet SBI vision):

1. Encourage the building of modular designs and disclosure of data to permit evolutionary designs,

technology insertion, competitive innovation, and alternative competitive approaches from multiple qualified sources

2. Encourage competition and collaboration through the identification of alternative solutions and sources.

.

- 3. Encourage the building of interoperable applications and web services and ensure secure information exchange using common services (e.g. common time reference), common operator applications (e.g. track manager) and information assurance as intrinsic design elements.
- 4. Identify reusable application software selected through open competition of 'best of breed' candidates, reviewed by subject matter expert peers and based on data-driven analysis and experimentation to meet operational requirements while improving the overall integration of mission capabilities.
- 5. Ensure life cycle affordability including system design, development, delivery, and support while mitigating obsolescence by exploiting the Rapid Capability Insertion Process.

Near-term Strategy:

Procure an open architected Commercial Off the Shelf (COTS) Common Operational Picture (COP) as a SBI commodity buy that could replace, or begin to replace, the current SBInet Block 1 COP and be used as the next generation COP to meet existing and future SBInet requirements as well as other SBI project requirements.

Near-term Execution:

Develop an RFP using special contract requirements that describe the use of open software and other key data for use by contractors in bidding on this new procurement for which openarchitecture compliance is a requirement.

Procure a solution, or multiple solutions, for test and evaluation

Subject: FW: ACTION: GAO response RE: nPRS & Acquisition Decision Memorandum (ADM) Action

Items

Importance: High

CAEs/Component Acquisition Support Staffs:

- 1. To follow up on this past week's Program Management Council (PMC) meeting of 20 January, I am asking for your support in responding to two actions tasked to DHS from a recent GAO information request:
 - a. The first action requests an updated status of Acquisition Decision Memorandum (ADM) action items (AI), and a summary statement from DHS identifying factors that have prevented implementation of the ADM AI within the established timelines
 - b. The second action requests the most recent nPRS monthly summary for each of the

programs being reviewed by the GAO in their ongoing major program review.

- 2. <u>ADM action items</u>. Please review your component programs' outstanding action items and provide APMD with updates on these items, with particular attention paid to overdue action items (for overdue action items, provide an assessment of what prevented on-time accomplishment, and when the action item will be completed). This week's Major Acquisition Program (MAP) report with open ADM AI's is forwarded to assist in your response. Please provide the Component response to (b)(6);(b)(7)(C)copy to (b)(6);(b)(7)(C) by COB 1 February 2010.
- 3. nPRS Program Reports. GAO has requested an updated nPRS report be provided at a program/project level for the following programs currently under review in the ongoing GAO review of major DHS programs:

<u>CBP</u>	<u>NPPD</u>	<u>OHA</u>	<u>TSA</u>	<u>USCG</u>
ACE	NCPS	Biowatch	EBSP	C4ISR
SBInet	US-VISIT		PSP	FRC
TECS MOD			SF	MPA
WHTI				NSC
				R21
				RB-M

To ensure that the most up-to-date data is provided to GAO on the programs identified above, please ensure that the Program Manager reviews (and updates, as necessary) the nPRS data for his program/project set. Please provide positive confirmation of this review for all affected programs/projects in your component to (b)(6);(b)(7)(C) nPRS lead, with copy to (b)(6);(b)(7)(C) by COB 1 February 2010.

4. If you have any questions please feel free to contact me or my staff. Thank you for your cooperation and quick response on this important matter.

Subject: RE: Additional questions for DHS

Hey be the Department is not changing the view that technology is a critical component of our border security efforts, but there are some long-standing issues with SBI net as it was initially designed. As you know, the program has yet to meet any of the deadlines, and it was actually supposed to be fully deployed by now. In fact, there is no near-term, reliable deadline for deployment. As such, our agents don't have — nor will they have anytime soon - this critical tool on the border.

In order to get technology on the border as quickly and efficiently as possible, the Secretary has ordered this Department wide re-assessment to bring in all of the expertise of the Department, e.g., Science and Technology, Management, other components, etc. to make sure the project as it has been designed and configured is, in fact, the best way to get technology on the border. We should have some more information to put out on the scope of the review and timeline shortly.

The Secretary remains consistent in the view that DHS should be aggressive in its pursuit of technology on the border.

Subject: RE: Additional questions for DHS

Many thanks for the briefing this morning. It was quite helpful.

On a somewhat different topic, can anyone at DHS HQ shed a little more light on the news item below regarding SBINet? What is the significance of the Secretary's call for a "department-wide reassessment" following on the heels of CBP's implementation review? The scope of the review, and labeling it a "reassessment," seems to suggest something more than a study for ways to improve design or execution. Is the Department considering cancellation of the SBINet project?

Napolitano orders SBInet reassessment

Electronic border fence has 'unacceptable delays' By Alice Lipowicz Jan 22, 2010

Homeland Security Secretary Janet Napolitano has ordered a reassessment of the \$8 billion SBInet virtual border fence program in Arizona after another round of delays in the program, an official confirmed today. Boeing Co. is the prime contractor on the project.

SBInet is an electronic surveillance system composed of cameras, radars and other sensors strung on towers and coordinated with other sensor systems, communications and command and control networks. U.S. Customs and Border Protection recently has been deploying a 23-mile segment of the system near Tucson, Ariz.

Napolitano requested the SBInet reassessment Jan. 8 after an internal evaluation revealed "unacceptable delays" in the program, according to a Jan. 11 e-mail message from Napolitano provided today by Matthew Chandler, a Homeland Security Department spokesman. Although the message did not state the extent of the delays, the Seattle Times recently reported that the initial operational segment, known as Tucson-1, would be three months late in beginning operation. Instead of beginning operation at the end of 2009, the operation has been delayed to March 2010, the newspaper said.

Napolitano indicated in her message that SBInet continues to fall short of expectations.

"Americans need border security now — not 10 years down the road. I am committed to ensuring that our border security programs are timely and cost-effective," Napolitano wrote.

"This fall, due to my ongoing concerns about SBInet, I directed the acting commissioner of U.S. Customs and Border Protection to evaluate its implementation. As his analysis uncovered unacceptable delays, last Friday I ordered a department-wide reassessment of the program to consider options that may more efficiently, effectively and economically meet our border security needs," Napolitano wrote.

Mark Borkowski, project manager for the Secure Border Initiative, which includes SBInet and other fencing programs, told Federal News Radio recently that the next segment of the project, Ajo-1, will be built as scheduled, but Boeing will not begin any new work until the reassessment is completed. Boeing got the initial SBInet contract in September 2006, and first built an 18-mile prototype of the system near Sasabe, Ariz. The border patrol has been using that prototype segment in its daily operations to protect against border incursions since it was accepted by DHS in February 2008. Borkowski a year ago said the system was undergoing additional testing before permanent construction would begin.

 \overline{Cc} : (b)(6);(b)(7)(C)

Subject: FW: CBP BUR Activity List and initial feedback from DHS PA&E

Enclosed is the feedback we have received from DHS PA&E on our BUR activities list. The comments are long and a bit of a mixed bag (looks like there were a few analysts providing comments). Budget will be providing general comments but CBP will need to have comments/counter proposal back to DHS by COB Friday. As you can see from the email below we have reached out to some of the other components to get some intel on what they have gotten in terms of comments. This may help guide us, but even if it is not fruitful, Budget will be providing comments back to DHS on Friday.

As you will see from the comments, while there are some concerns about OFO's activities and the granularity, they recognize that this has been driven by the fees. They also recommend we look at the activities in the statement of net cost, and see what can be used from there to add detail. Short answer is I don't think we will have much work to develop comments/counter proposals for OFO. For OIOC, OBP, SBI and OAM the task is more complicated. DHS has offered a number of options, some of which may work and some may not and/or may conflict with each other.

Budget would like to meet with OBP at a minimum and possibly OBP, SBI and OAM together to discuss any recommendations on an alternative approach. We will be reaching out to OBP (probably Wednesday) to set up a meeting which will hopefully work with OAM and SBI's schedule. For OIOC we will reach out to you separately to discuss your thoughts.

The only option not on the table is to ignore DHS completely. We would like your input but budget will be addressing their concerns with or without your support. We need to have an approach which works for all of CBP, but is consistent with how we do business. We look forward to sitting down and discussing this with you.

Subject: CBP BUR Activity List and initial feedback from DHS PA&E

Happy New Year Fellow Budget Officers-

I am enclosing DHS's initial feedback on the activities list for the BUR for CBP. There are a number of comments, and it looks like CBP, ICE, TSA and USCG will be pulled together to address some come activities. If it all possible, I would like to get together this week (in person or on the phone) to understand how your organizations are moving forward and to share our thoughts. If you feel comfortable, we would love to see the comments on your activities. This is not so much to feel better about what we have done (ok, maybe just a little) but to understand DHS's approach across the board. One of the comments we have received

is that our activities list is not granular enough. It would be great to know if you have received similar feedback and/or how you are going to respond. It may be helpful for us to collaborate more frequently as we move forward, but we can discuss when we meet this first time.

We will be sending you an invite to a meeting/call-in for Tuesday or Wednesday. If there is a time that is particularly bad, please let us know. I am copying the CBP BUR leads. Please let us know if there are people on your staffs that should be included.

Thanks,

(b)(6);(b)(7)(C)

Subject: SBInet Status

Chief--

Since we didn't have staff meeting or ESC yesterday, I thought I'd give you a quick update on the current status of SBInet.

As you know, testing will be delayed. However, we think the basic system that's constructed in Tucson is pretty good.

(b) (7)(E)

-I

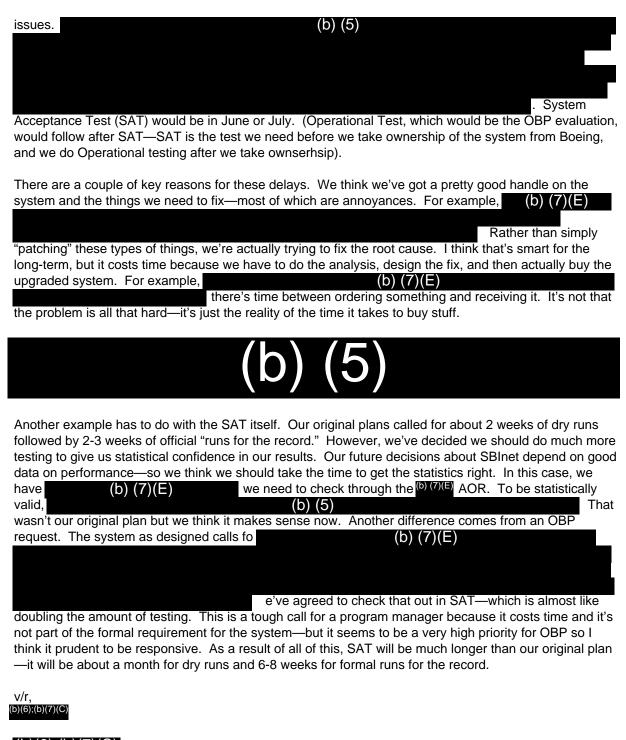

think it would be irresponsible to take full ownership until everything's done-

(b) (7)(E)

Therefore, we are working with Boeing to turn the system over to the Border Patrol for "Initial Operations and Familiarization" (we're still working on the right terminology but that seems to get the basic message across). We may be able to do this as soon as January 25. Over the next months, as we're waiting to complete testing, the Border Patrol will be able to use the existing system, with support from Boeing as required, on a non-interference basis. That will generally mean it will be available to support operations

(b) (7)(E)

That way, we can take advantage of what we have while we continue to work on cleaning up remaining

DRAFT

CBP SBI Systems Engineering Directorate

Presented by (b) (6) Director of Systems Engineering

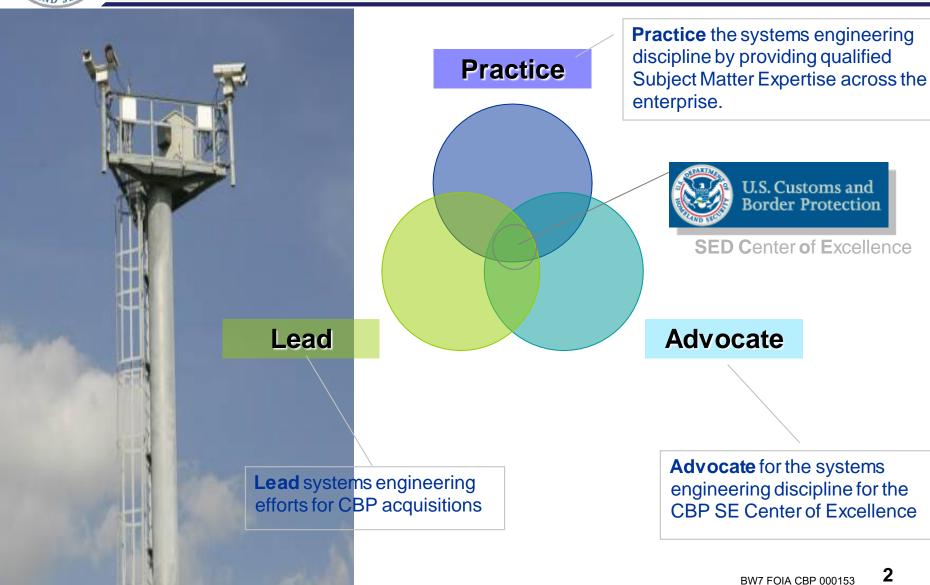

5 January 2010

CBP SBI Systems Engineering Directorate (SED) Vision

CBP SBI Systems Engineering Directorate (SED) Mission

- The Systems Engineering Directorate is the Practice Lead within CBP for Systems Engineering:
 - Develops and applies Systems Engineering practices across the CBP enterprise by:
 - Identifying
 - Defining
 - Maintaining
 - Executing
 - and monitoring system engineering processes throughout a system's entire life cycle

Practice

- Trains and supplies Subject Matter Experts
 - Provides technical Subject Matter Expertise (SMEs) to CBP acquisition programs/projects (current focus is SBInet)

CBP SBI Systems Engineering Directorate (SED) Mission (cont.)

- The Systems Engineering Directorate leads program and enterprise efforts to achieve superior technical outcomes through:
 - Process Improvement
 - Continuously monitor and improve the Technical and Technical Management Processes.
 - Quality Control
 - Monitor and improve the quality of Systems Engineering Products that impact Cost,
 Schedule or Technical Performance
 - Applied Systems Engineering and Guidance/Mentoring
 - Provides guidance and mentoring for the SE processes by participating in Integrated
 Product Teams and Technical Review Boards

CBP SBI Systems Engineering Directorate (SED) Mission (cont.)

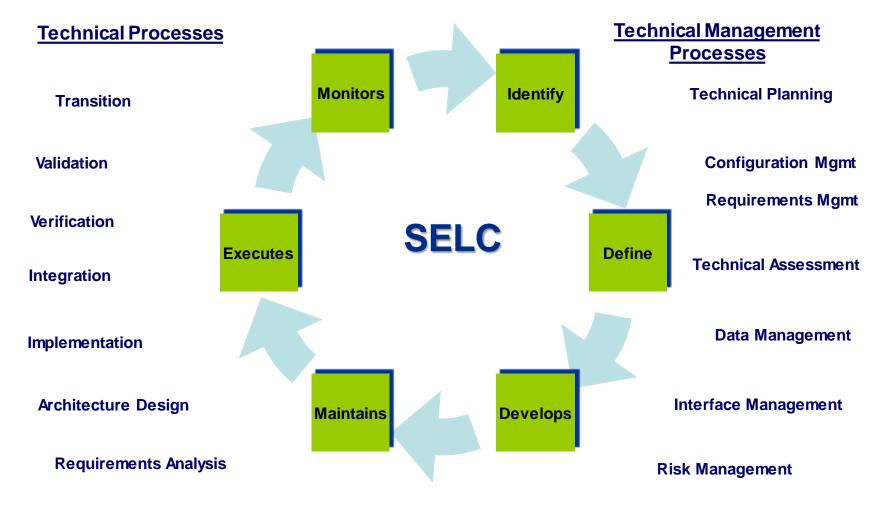

• The Systems Engineering Directorate is the CBP and Program Systems Engineering advocate:

Systems Engineering Directorate Technical and Technical Management Processes

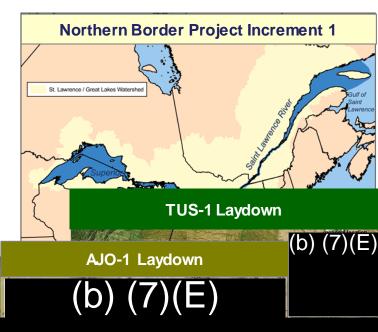

Systems Engineering Directorate SBI Program Activities

- The SBI Systems Engineering Division supports SBInet in the following Projects:
 - System Block Development for Block-1
 - Southwest Border projects:
 - P-28
 - C3I/COP
 - TUS-1
 - AJO-1
 - Northern Border projects:
 - Increment 1: Surveillance Enhancement Project
 - Increment 2: Integration Demonstration Project
 - P-25 Tactical Modernization Program
 - Spectrum Relocation

Program & Technical Authority

- •Sets system level technical direction and content
- •Develops standards, architectures, tools and processes
- •Provides systems engineering SMEs to Programs and Projects for production assistance to ensure proper implementation
- •Ensures engineering products are complete and meet program needs
- •Ensures resource competency, allocation, career development

Interface

Test

Implementation

Interface Areas

- Execution of technical management processes
- Execution of technical processes
- Issue Resolution

Project Production Authority

Program Managers and Analysts

Deployment

- •Accountable to the SBI Program Manager for executing SBI*net* production as designed by the SED
- •Responsible for all production aspects of Program management (Cost, Schedule, Performance)
 - Production Planning
 - Measure progress
 - •Report status FOIA CBP 000159

SED Technical Authority

•The Systems Engineer (SE) Technical Authority (TA) is responsible for the following activities:

- Elicits stakeholder requirements
- Analyzes requirements
- Develops the Functional Architectural Design
- Guides Physical Architectural Design
- Guides Developer Implementation Activities
- System integration
- Verifies that system meets requirements baseline
- Transitions the system to the production environment
- Validates that the system meets the users operational needs
- Sustains the system in its operational environment
- Maintains the system until it meets the end of its life cycle
- Disposal of the system

SBI Program Project Production (P3) Authority

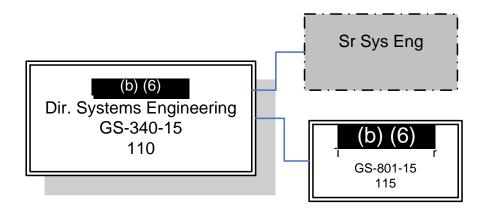

•The Executive Director for SBInet has Program Authority (PA) and is responsible for the following activities for the PEO:

- Executes programmatic functions (Cost, Schedule, and Performance)
- Ensures alignment with SED Architecture Specifications and SE Processes
- Develops and assesses the Production Plan
- Controls production execution
- Responsible for Production decision-making
- Monitors and mitigates Production risk associated
- Produces the product

Systems Engineering Directorate Office of the Director

Director Systems Engineering – (b) (6)

Mission - The CBP/SBI Systems Engineering Director provides <u>supervisory functions</u> for a diverse staff of engineers, analysts, and computer scientists which includes: setting priorities and schedules; assigning; making decisions on issues presented by the staff; communicating performance requirements; evaluating work performance; and executing personnel actions. The CBP/SBI Systems Engineering Director assists the SBInet Program Manager to <u>identify</u>, <u>direct and maintain the resources</u> (e.g., personnel, facilities, equipment and funds) to achieve SBInet capabilities.

CBP/SBI Systems Engineering Director Responsibilities

•Responsibilities - SBI Systems Engineering Director ensures:

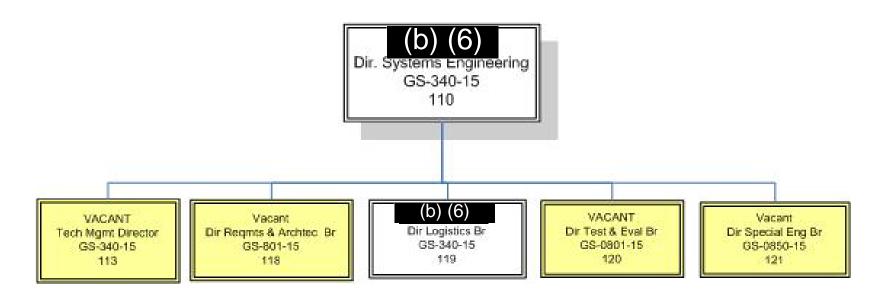

- strategic technical issues/tenets drive the program management structure and decision framework
- SBI's established mission, vision, and management philosophy for the systems engineering enterprise is adhered to
- IEEE or equivalent Systems Engineering and Software Development standards are used in developing the SBI product suite
- development of the systems engineering toolbox (i.e., design reference mission, formalized metrics, modeling and simulation tools, assessment tools) necessary to execute a discipline systems engineering approach
- assistance to the SBInet Program Manager to identify, direct and maintain the resources (e.g., personnel, facilities, equipment and funds) to achieve SBInet capabilities

•Deliverables – products are delivered by each division within the directorate and coordinated at the Director level for internal SE approval before release to the Program Management Authority

Systems Engineering Directorate Divisions

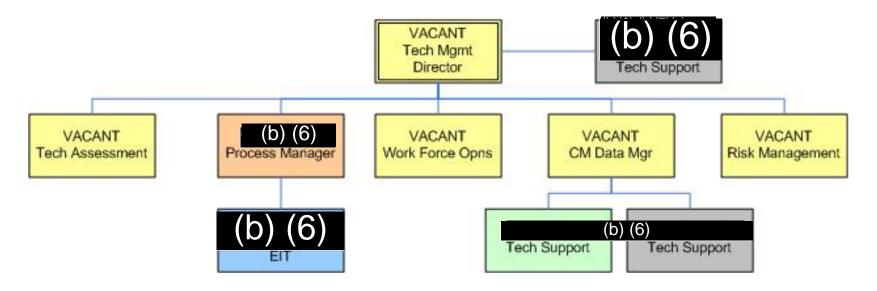

Mission - The Systems Engineering Directorate Divisions support the Systems Engineering Director by ensuring SBI engineering staff execute across the program and in alignment with the SBI Program and SE Division Vision, DHS and CBP acquisition policies, all Technical and Technical Management Processes, the Technical Baseline, the SBI*net* SELC as documented in the program's Systems Engineering Plan (SEP), and the SBI Enterprise Architecture to produce quality integrated SBI capabilities meeting the end users' needs.

CBP/SBI Systems Engineering Directorate Technical Management Division

Director - VACANT/ (b) (6) Acting)

Mission -The CBP/SBI Technical Management Division, under the Director of Systems Engineering, develops manages, and executes industry best Technical Management Processes and Practices for Systems Engineering across CBP and within acquisition programs such as SBInet. Technical Management Processes such as Configuration Management, Risk Management, and Quality Control ensure the proper control and delivery of superior engineering products while mitigating program risk (cost, schedule, and technical performance).

Technical Management Division

- •Responsibilities manages the technical management processes executed across the SBI program. Executes the following responsibilities for the program:
 - SE Process development and execution
 - Quality Control & Assurance
 - Configuration Management
 - Risk Management
 - Work Force Operations Development
 - Develops and sustains all SE processes ensuring proper execution across the program

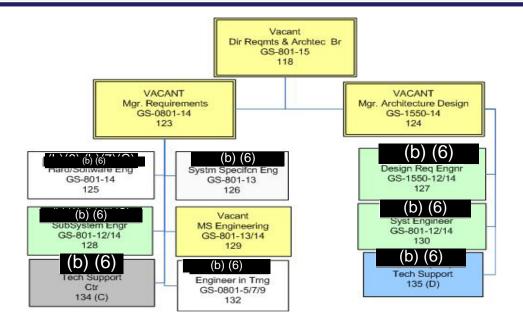

•Deliverables -

- SE Technical and Technical Management Processes
- Technical Review Manual
- Quality Assurance Plan
- Risk Management Plan
- Configuration Management Plan

Systems Engineering Division Requirements & Architecture – Organization

Director - VACANT

Mission -The CBP/SBI Requirements and Architecture Division, under the Director of Systems Engineering, manages the Requirements Process for CBP/SBI by identifying, documenting, analyzing, tracing, tracking, prioritizing, and agreeing on requirements, sets the requirements baseline and then controls change and communicates any changes to relevant stakeholders. It is a continuous process throughout CBP's acquisition programs and SBI*net*.

Systems Engineering Division Requirements & Architecture

•Responsibilities – manages the requirements management process for the SBI program.

- ensures form, fit and function of all user defined and system derived functional, non-functional, and performance requirements;
- interface to the Requirements Review Board
- ensures alignment of all requirements to the CBP EA through architecture modeling and analysis
- contributes to infrastructure and environmental impact analysis
- coordinates with T&E on the development of the Test and Evaluation Master Plan
- develops Service Level Agreements (SLAs)
- responsible for Information Security Assessments and plans

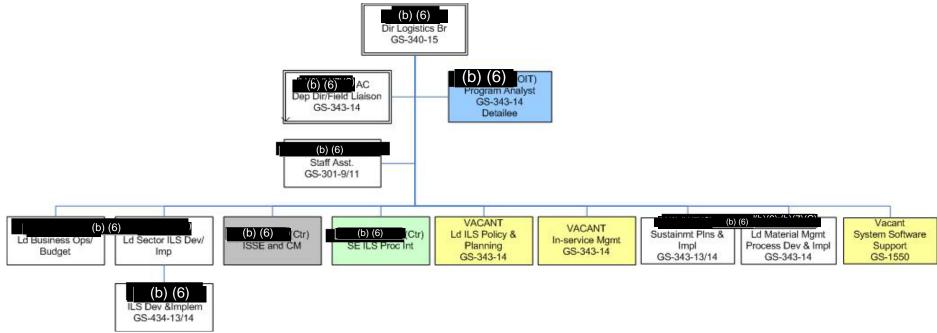

•Deliverables:

- Requirements Traceability Matrix
- SBI Enterprise and System Architectures
- Interface Control Documents
- Service Level Agreements
- Systems Security Plan
- Security Risk Assessment

Systems Engineering Division Integrated Logistics Support

ILS Division Director (b) (6)

Mission – The SBI ILS Division, under the Director of Systems Engineering, supports the acquisition and sustainment of critical border enforcement assets through the development and implementation of ILS requirements in accordance with DHS Acquisition Directive 102-01, Appendix J. The ILS Division ensures for the program that design considerations are met to support customer needs in the areas of reliability, maintainability, and availability, to optimize border enforcement operations at optimal life-cycle costs

Systems Engineering Division Integrated Logistics Support

- •Responsibilities manages supportability and sustainment requirements for SBI baseline technology products by:
 - establish a CBP wide ILS Integrated Product Team to develop a CBP capability to sustain border enforcement technology
 - develop a model to integrate logistics engineering requirements into the systems engineering process
 - partner with CBP/SBI acquisition offices to develop an O&M budgeting process/model suitable to meet SBI and legacy life-cycle support needs
 - identify and develop an ILS infrastructure to meet the life-cycle support needs of critical border enforcement technology
 - work with the Office of Administration, Acquisition Directorate, in the development and implementation of DHS-wide ILS
 Policy in support of DHS AD 102-01, Appendix J
 - develop tailored engineering specification requirements to meet the reliability, maintainability, and availability needs of the border enforcement end user communities

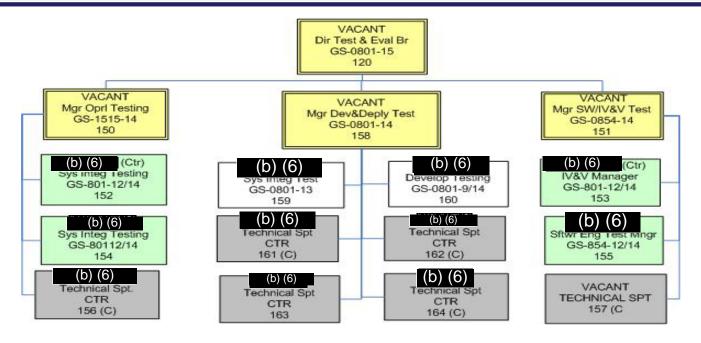

•Deliverables:

- Integrated Logistics Support Plan
- Supportability and Sustainment Risks
- In-service engineering plans
- Technical Training Plans
- Reliability, Maintainability, and Availability Plans
- Trade studies
- Operations and Maintenance budget development and expenditure planning

Systems Engineering Division Test & Evaluation

Director Test and Evaluation Division – VACANT

Mission – The SBI Test and Evaluation Division under the direction of the SED Director develops, implements, and executes all CBP and SBI Test and Evaluation Processes in coordination with SBI*net* ensuring that all program and project requirements are implemented correctly for a given capability - does the product do what it is suppose to due as envisioned by the end users.

Systems Engineering Division Test & Evaluation

- •Responsibilities ensure that all requirements in the SBI Baseline are tested and meet the users end needs through testing, verification and validation techniques and methods. Included are the following activities:
 - manages and execute all test activities to include Acceptance and System Qualification Testing
 - develops test scenarios
 - Develops Test Plans
 - responsible for coordinating verification and validation testing of all SBI requirements
 - coordinates product development with the Requirements and Architecture Branch
 - develop security certification documentation

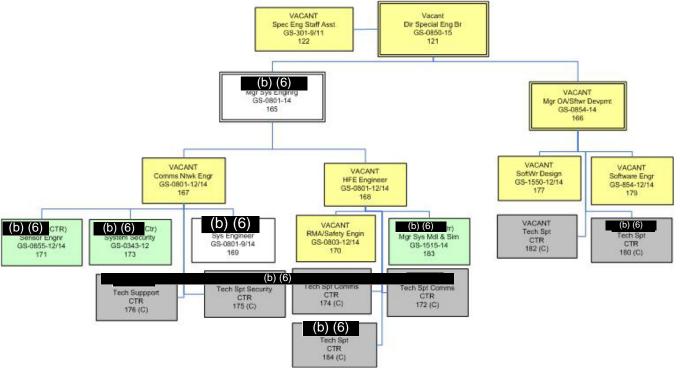

•Deliverables:

- Test and Evaluation Master Plan
- Operational Test Scenarios
- Verification and Validation of all SBI Baseline Requirements
- Product and Program Maturity Assessments
- SBI Test and Evaluation Data Management Plan
- SQT Detailed Test Plans
- Security Certifications

Systems Engineering Division Specialty Engineering – Organization

Director Specialty Engineering Division – VACANT

Mission – The SBI Specialty Engineering Division under the direction of the SED Director provides SMEs to support the design, development, and implementation of supportability, maintainability, reliability, and dependability requirements for a capability (its sub-systems and components) within the program/project.

Systems Engineering Division Specialty Engineering

•Responsibilities - Provide program engineering Subject Matter Expertise (SME analysis and support) in current and future SBI technologies such as:

- (b) (7)(E) ---
- Software and Hardware technologies

•Products:

- (b) (7)(E) Program Plan
- Human Factors Engineering assessment and design
- Environmental Impact analyses
- Reliability, Maintainability, Availability Analysis

ALL- Please note the tasking below for questions that are due back to the S1. (b)(6):(b)(7)(C) and his staff will be reaching out to you early Monday with an expectation that you can provide a response by COB Monday. Since this is going to the S1 it is expected to be reviewed by you and/or your AC. I would ask you to remind the staffs that are preparing the responses that the audience is the S1. This is a very quickly turn around and we will not have time to do much editing. The response should be as short and to the point as possible.

(b)(6);(b)(7)(C)

Please have Analysis Division take the lead in getting the answers prepared with the responses from the offices. Integration will be responsible for clearing them through CBP leadership and getting them back to DHS CFO. I have indicated the offices and copied some of their leadership on this email so that they are aware and can start directing staff to respond. As you can see they are due COB Tuesday. The offices need to have their answers back to Budget by COB Monday.

- 1. Need a factsheet on TECS with the historical and future funding profile and existing and planned functionality. (OIT with OBP and OFO assist on functionality)
- 2. Need historical and future funding profile for AMOC both operating costs and development/construction. (OAM)
- 3. How will CBP (b) (7)(E) funded in FY 2011? (OIOC-I

believe this is mostly answered in the issue paper I have attached)

- 4. Should S1 decide to expand IAP what would CBP recommend in terms of new locations? How many could be initiated in 2010 and what is the additional cost in 2010 and 2011? How many could be initiated in 2011 and what is the 2011 costs? (**OFO**)
- 5. Will CBP obligate all of the ARRA money in 2010? And if not, can it be used as a reprogramming source? For this response we should go back to what we have been saying in the weekly ARRA report. I believe there are some LPOE dollars which may not be obligated until FY 2011. We should pulse the organizations on the current spend plans and see if there is any change to the ARRA plans. The question about reprogramming will be for the CBP leadership to answer and none of the offices are expected to provide a response.(FME, OIT, SBI, OFO)

Subject: CBP Budget questions from S2

When I updated S2 on the budget changes that occurred after Christmas she had a number of follow-up questions on CBP.

- 6. Need a factsheet on TECS with the historical and future funding profile and existing and planned functionality.
- 7. Need historical and future funding profile for AMOC both operating costs and development/construction.
- 8. How will CBP (b) (7)(E) funded in FY 2011?
- 9. Should S1 decide to expand IAP what would CBP recommend in terms of new locations? How many could be initiated in 2010 and what is the additional cost in 2010 and 2011? How many could be initiated in 2011 and what is the 2011 costs?
- 10. Will CBP obligate all of the ARRA money in 2010? And if not, can it be used as a reprogramming source?

Can you provide these answers by COB Tuesday? You can send them in piecemeal.

Subject: AJO CRR

Date: Thursday, January 21, 2010 10:52:06 PM

: Finished up the CRR a short while ago. Did not give Boeing approval to start construction. The WOPs are not completed and released.

The WOPs were due to SWFO on Monday but not delivered until today. SWFO worked with L-3 and Boeing QA today to review the WOPs and should finish tomorrow. Then any corrections need to be made by L-3, approved, and then formally released. Boeing and L-3 said this will all be completed by Sunday, but given the track record, I don't trust them and feel we need use this to force them to get the WOPs done. Thus Boeing was told that we're defering approval to start construction until they formally release the WOPs.

There are a number of other areas that concern me and a number of action items that need to be addressed. But I expect construction will start next week, but it might not be Monday. We have given Boeing additional constraints to enforce the need for them to get actions completed.

I'm scheduled to fly back tomorrow at 0600. Will give you a more detailed debrief tomorrow afternoon if I don't get delayed enroute.

Thanks

(b)(6);(b)(7)(C)

We had the follow-up meeting with reps from DHS S&T and DHS CPO, as we agreed with last week. We've got a sketch of a time-phased way forward for the overall SBInet review based on today's discussion.

wanted to have fairly frequent updates and statuses, at least for the next couple of weeks. We had agreed we would set something up with him and the other participants from last week, once we completed our smaller group meeting (the one we held today).

Would you like to take the initiative to schedule a status update with me to handle from here?

Thanks,

Importance: High

Good morning, ARRA Program Managers and key contacts -

Please update the attached Excel file for week 47 (using week 46's final report, now a draft for week 47), and submit your input for the "Status of ARRA Projects" to (b)(6);(b)(7)(C) not later than NOON TODAY 01/14/10 (DUE TO THE HOLIDAY).

As always:

- · Please highlight in yellow any cells with changes.
- Please use this exact version of the report.
- Please return this report in an email separate from the Weekly Update report (kindly do not submit both in one email).

As a reminder, please include all projects that have already been obligated, as well as anything we expect to obligate. If any projects originally scheduled have been pushed back, please note that and continue to include them on the spreadsheet.

If you have any questions, please contact us at (b)(6); (b)(7)(C) Thank you.

Chief--

FYSA, S1's staff has scheduled a meeting for Friday afternoon, presumably tpo frame out the review.

Also--if we ever get an opening to get DHS to loosen the shackles and let us continue our communications strategy (which, by the way, is a big part of the reason the 60 Minutes thing was not so bad), we will all be better off. As it stands, DHS is making us refer everything to them--and I'm concerned it's going to destroy the relationships we've established, compromise our credibility, create misinformation (due to lack of detailed knowledge), and broken glass we'll end up cleaning.

I obviously wouldn't tilt at windmills just yet--but if the opportunity presents itself...

Thanks and vr,

(b)(6);(b)(7)(C)

In one of the breaks that we had yesterday in dealing with all the activities surrounding the 12/25 incident, Haiti, and another hot button item, the Secretary and I had a chance to very briefly discuss SBInet, the 60 Minutes piece, and path forward. She is of the same opinion as we are: the 60 Minutes piece was a lot less negative than what we had anticipated and she also thought that Boeing took the brunt of the piece. She also stated that the purpose of the memo that went out with her directing the "review" of SBInet was in anticipation of a more negative piece. But basically she agrees with the options paper that we put forth before the holidays. She did not specifically identify option 2 as her preference but as she lined out her recollection of the memo and it fits right along with Option 2. She noted that she had "spoken to Congress" about this and that they were not surprised and supportive. I did not ask how this communication was done, formally or informally. Given the timeline from when we sent the paper forth I would guess that it was a verbal and informal.

This being the case we need to look at redesigning our thought process as to technology capability requirements (i.e, detection, deterrence, identification, classify, etc.. or mix of) that we would be looking to get resourced under this option. Exercising this option or something similar to it would mean that we would be weighting our resource procurement efforts and requirements towards "commodity purchases" of technology versus "system development". Not that we would stop the systems development completely (block one). I would ask that Border Patrol revisit our technology requirements against this new information.

Keep me apprised.

Attachments: BSFIT Issue Paper 1-13-10 - trimmed to 2 pages BJ edits v1.doc

(b)(6);(b)(7)(C)

A little late, but I took another cut at this, tried to streamline and hit standing by....

Border Security Fencing, Infrastructure, and Technology

(\$s in millions)	FY 2009	FY 2010	FY 2011
	Enacted	Enacted	Request
Border Security Fencing, Infrastructure & Technology	\$775.0	\$800.0	\$574.2

KEY POINTS

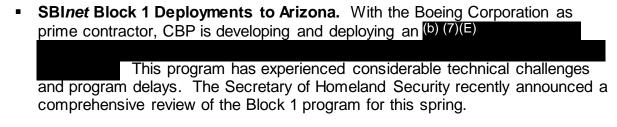

The FY2011 \$574.2 million Border Security Fencing, Infrastructure, and Technology (BSFIT) President's Budget requests funds for—

- **Tactical infrastructure** (fencing, roads, lighting, etc) to facilitate agent access and provide persistent impedance for deterring illicit cross-border activity, and
- **Technology** to enable situational awareness and more effective collaboration.

Over the past several years, the BSFIT program and funding priority was to complete fencing to deter and/or delay illegal incursions along the border. CBP has completed—

- (b) (7)(E) of pedestrian fencing
- of vehicle fencing
- (b) (7)(E) total fencing completed to-date

With the FY2011 President's Budget request, CBP is focusing primarily on acquiring and deploying border surveillance, command and control technologies along the southern and northern borders. These technology investments include—

- Other Technology Deployments. CBP is acquiring and deploying other affordable, high payoff capabilities for near-term border surveillance needs. FY 2011 funds will be used to procure (b) (7)(E)
 , as well as pilot new technologies for enhanced situational awareness.
- Northern Border Projects. Today, CBP is deploying proven (b) (7)(E) border patrol sectors. FY 2011 funds will be used to demonstrate and deploy additional capabilities against priority threats.
- (b) (7)(E) Tactical Communications Deployments. CBP is (b) (7)(E)

■ Tactical Infrastructure (TI). New TI investments will be reduced from \$110 million in FY 2010 to \$25 million in FY 2011. CBP has identified priority projects, to include completion of primary pedestrian fence in (b) (7)(E)

FOLLOW UP QUESTIONS

What are the issues delaying deployment of Block 1?

The system qualification testing identified a number of technical issues that had to be corrected or mitigated and retested. Additionally a problem with a commercial off-the-shelf (COTS) component in the system requires the component manufacturer to make revisions that are taking several months. Future plans have been extended to allow a more disciplined and rigorous development and testing effort.

What is the status of SBInet 1 deployment to Arizona?

The P28 "prototype" system remains in operation today in Tucson sector. CBP has completed construction of the first Block 1 "production" system in Tucson, and integration and acceptance testing will continue through the summer. CBP is preparing to construct the second Block 1 system in AZ, with initial operations planned for the end of the year. Following testing and analysis of these two deployments, the Department will consider if, and to what extent, Block 1 deployments continue at priority areas of the border.

If the FY 2011 President's Budget request is fully funded, are there any Block 1 resource requirements beyond FY 2011?

Yes. Procurement and deployment for Yuma Sector will need to be funded in the following years. The Department's current plan is to complete the deployment of SBInet Block 1 to Arizona in FY 2013.

Why was funding for additional Tactical Infrastructure reduced in the FY 2011 budget?

In this challenging fiscal environment, tough choices must be made concerning operational priorities. Fencing has been completed at the highest priority areas, and operational priority has shifted to expanding situational awareness with Block 1 and other (b) (7)(E)

I don't understand the question well enough. The spend plan will be late relative to the congressional deadline, due to several reasons. However, we have been given no other guidance to suspend the program or delay the spend plan while the Dept considers alt program futures. So, I think the answer to his question is "the BSFIT Expenditure Plan will be submitted late as we finish FY10 detailed planning, however CBP is not intending to delay the Plan for future Dept-wide program assessments to be conducted later this Spring."

Subject: FW: Issue Papers

(b)(6);(b)(7)(C) and (b)(6);(b)(7)(

Enclosed are seven of the eleven papers CBP will be submitting to DHS into the S1 briefing book for preparation for the budget hearing. One paper was on the wrong topic (b) (7)(E) and will be coming later

today, but I should have three more this morning.

I have kept track changes on, so that you can see what I deleted. I would ask that you send your edits back, with track changes on. I noticed that we have some inconsistent formatting, so Budget will be making all of the papers correct for the prescribed format. Once we get your edits, we will add them to the master files.

-We will let FME know, but we have deleted a paper that they submitted but was not asked for. believes the S1 needs a paper about the lack of funds for construction in CBP. CBP is already over the limit on these papers (DHS want 5-6 and we have 11).

(b)(6);(b)(7)(C)₋

Can someone on the staff take all of these papers and correct the format? We have different bullet style, fonts, bolding etc. Also, on the Southbound Paper we need to fill in what is being sustained in the FY 2011 budget from the FY 2010 Southbound Initiative.

Thanks,

Subject: SBI Program Status

Date: Wednesday, January 27, 2010 10:24:15 AM

First, thank you for taking the time to hold two informative sessions to keep the organization up to date on what is happening with SBI and SBInet. I am sure that all who were able to attend appreciated hearing "the latest" and appreciated the "dynamic delivery" of the information.

I think the formulation of program options ranging from "everything" to "nothing" was long overdue and is timely as well. Now in my third year on the program, I have seen many good ideas come and go and saw the program frequently criticized often for all the wrong reasons. When, two years ago, we scaled the SBInet concept down to Block-1, which then was scaled down even further, many lost sight of what needs to be done and could be done in order to control and protect the borders. Having grown up in Europe and having lived through WW2 border protection was kind of second nature for all that lived through it.

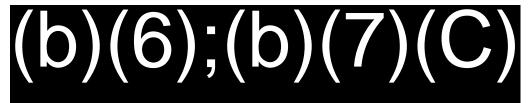

Option 2, as defined in the document you let us read, will bring back the possibilities and potential capabilities that were initially envisioned for SBInet. It also brings a measure of realism from the programmatic side of things. Staying for the time being with Block-1 capabilities and exploring the addition of complementary technology is the best we can do in the near term while gaining the experience of the agents as they get to use this new system.

There were several studies done in conjunction with the Northern Border project. In particular one of the studies examined the benefit of integrating many of the currently existing capabilities provided by local, state, and federal authorities that at this time operate independent of each other. As a member of the SEDI Advisory Panel chaired by DHS S&T I suggested that the Department might want to explore this idea with SBI and SBInet being the catalyst for such synergistic capability. (b)(6):(b)(7)(C) who heads up the administrative part of SEDI was quite interested, took a lot of notes, and thought the Department should start some effort in that direction. I cautioned him that those were just some ideas I was offering up but any real work required a conscious decision and of course commitment of funds.

Subject: RE: 30-day Hold - GAO FINAL Report Secure Border Initiative - DHS Needs to Address Testing and Performance

Limitations that Place Key Technology Program at Risk (310673)

Date: Wednesday, January 27, 2010 9:48:50 AM

GAO has their own protocols for issuance of reports – as such; GAO has indicated they will not deliver a copy of the final product to DHS until the hold has expired or until such time as congress releases the hold. GAO's Agency Protocols, GAO-05-35G, states that "GAO reserves the right to release any report that is under restriction (30-day hold), but issued to the requestor, if the report's contents are made public prior to the expiration of the restriction."

In short, if you are not a requestor, you will not receive a copy until either the 30-day hold expires or the document is released publicly prior to expiration of the 30-day restriction.

Hope this helps.

All,

We just received word that GAO is expecting to release the FINAL report on SBInet testing (job 310674) this Friday, January 29, 2010. However, GAO has indicated that their congressional clients have requested a 30-day hold on public issuance of the report; therefore, GAO will not deliver a copy of the final product to DHS until the hold has expired.

Please let me know if you have any questions/concerns.

Thanks!

(b)(6);(b)(7)(C)

CBP has to respond to some questions from the S2, one is on ARRA. Please review and let me know if the last para below is acceptable.

-We

-We have incorporated SBI's answer too.

S1 QUESTION #5

Will CBP obligate all of the ARRA money in 2010? And if not, can it be used as a reprogramming source?

S1 Answer #5:

CBP has plans to obligate all ARRA funds by the end of FY 2010. The projects and activities funded with ARRA funds have been carefully planned and those plans are regularly and rigorously reviewed.

The Department is currently reviewing the use of some portion (about \$35M) of the ARRA funds supplied to the Secure Border Initiative (SBI). Earlier plans were to use those funds to begin procurement of additional SBInet deployments to Arizona. However, the program continues to experience delays and I have ordered a Department-wide review of SBInet. It does not appear prudent to commit to additional SBInet procurements until we have looked more carefully at the program. We may be able to re-direct these SBInet funds to other

(existing) technologies, like camera poles or (b) (7)(E) , to fill immediate needs and gaps along the Southwest Border. We will decide that within the next couple of weeks. If we cannot re-direct the funds effectively, they may become available as a reprogramming source.

In addition, the costs for the first round of construction projects for the Land Ports of entry have been consistently lower than had been estimated. There have been many factors that have contributed to this lower than expected costs, and it is possible that if this trend continues, CBP would not have enough LPOE construction requirements to utilize all of the ARRA funding. This is being regularly reviewed, and at this point there is no anticipation that CBP will lapse ARRA LPOE dollars.

Thanks,

Subject: RE: CBP Budget questions from S2

ALL- Please note the tasking below for questions that are due back to the S1. (b)(6);(b)(7)(C) and his staff will be reaching out to you early Monday with an expectation that you can provide a response by COB Monday. Since this is going to the S1 it is expected to be reviewed by you and/or your AC. I would ask you to remind the staffs that are preparing the responses that the audience is the S1. This is a very quickly turn around and we will not have time to do much editing. The response should be as short and to the point as possible.

Please have Analysis Division take the lead in getting the answers prepared with the responses from the offices. Integration will be responsible for clearing them through CBP leadership and getting them back to DHS CFO. I have indicated the offices and copied some of their leadership on this email so that they are aware and can start directing staff to respond. As you can see they are due COB Tuesday. The offices need to have their answers back to Budget by COB Monday.

- 1. Need a factsheet on TECS with the historical and future funding profile and existing and planned functionality. (OIT with OBP and OFO assist on functionality)
- 2. Need historical and future funding profile for AMOC both operating costs and development/construction. (OAM)
- (b) (7)(E) **3.** How will CBP funded in FY 2011? (OIOC- I believe this is mostly answered in the issue paper I have attached)
- 4. Should S1 decide to expand IAP what would CBP recommend in terms of new locations? How many could be initiated in 2010 and what is the additional cost in 2010 and 2011? How many could be initiated in 2011 and what is the 2011 costs? (**OFO**)
- 5. Will CBP obligate all of the ARRA money in 2010? And if not, can it be used as a reprogramming source? For this response we should go back to what we have been saying in the weekly ARRA report. I believe there are some LPOE dollars which may not be obligated until FY 2011. We should pulse the organizations on the current spend plans and see if there is any change to the ARRA plans. The

question about reprogramming will be for the CBP leadership to answer and none of the offices are expected to provide a response.(FME, OIT, SBI, OFO)

Subject: SBInet

(b)(6);(b)(7)(C)

As you know, there is a review of SBInet commencing. You may both be already involved in this, but I wanted to draw two points to your attention:

- 1. The review will obviously include some technical evaluation of SBInet, but if it is restricted to that focus then there will be a risk that it does not answer the underlying questions at hand, e.g., should we buy more SBInet, what kind of SBInet should we buy, etc. I recommend that the PLCY and planning community be involved in this process to ensure that the most important questions get addressed.
- 2. An aspect of the review will probably deal with very short-run issues of obligation rates for existing funds. Some are concerned that ARRA and regular appropriations are not on track for full execution and will push for quick obligation. These quick turn-around decisions may be something

we want to discuss with folks to advance our ideas on greater domain awareness and greater empirical understanding of the border domain for use in improved management and employment of DHS resources in this mission area.

(b)(6);(b)(7)(C)_{seems} to be the CBP lead on this and at HQ it is (b)(6);(b)(7)(C)_{and} (b)(6);(b)(7)(C)_{in} OUSM. (b)(6);(b)(7)(C)_{and} and I can also be a conduits to this process. Again, I recommend the policy and planning communities of CBP and DHS be involved in this process.

Subject: SBI Update Briefings for House/Senate Homeland

Good Morning Gentlemen,

House and Senate Homeland staff have requested that CBP come up and provide briefings next week to update them on the latest with SBInet.

I anticipate the briefings will primarily focus on the latest delays to the timeline and the Secretary's call for a "review" of the program, however they will likely also ask questions about BP's early "familiarization" with the system (i.e., how it will work, whether there will be a mechanism to provide feedback on the system or if it will be strictly informal), operational testing, and possibly other issues that BP would want to chime in on.

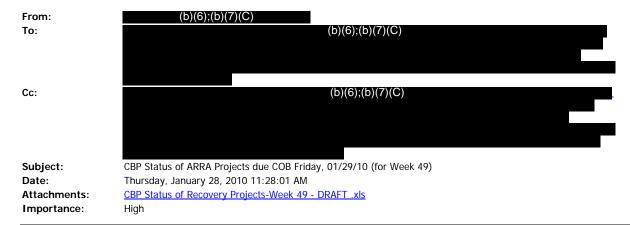

As of right now, we are looking at 10:30am-12:00pm next Tuesday, February 2, to meet with Senate Homeland. I am trying to arrange the House Homeland briefing for either Tuesday afternoon or possibly sometime on Thursday.

Would you or someone from your group be available to participate in these briefings next week?

Thank you!

U.S. Customs and Border Protection Office of Congressional Affairs

(b)(6);(b)(7)(C)

Good morning, ARRA Program Managers and key contacts -

Please update the attached Excel file for week 49 (using week 48's final report, now a draft for week 49), and submit your input for the "Status of ARRA Projects" to (b)(6);(b)(7)(C) not later than COB Friday, 01/29.

As always:

- · Please highlight in yellow any cells with changes.
- Please use this exact version of the report.
- Please return this report in an email separate from the Weekly Update report (kindly do not submit both in one email).

As a reminder, please include all projects that have already been obligated, as well as anything we expect to obligate. If any projects originally scheduled have been pushed back, please note that and continue to include them on the spreadsheet.

If you have any questions, please contact us at (b)(6);(b)(7)(C). Thank you.

For the latest information on CBP ARRA efforts, please visit the CBP ARRA Working Group KMS site at:

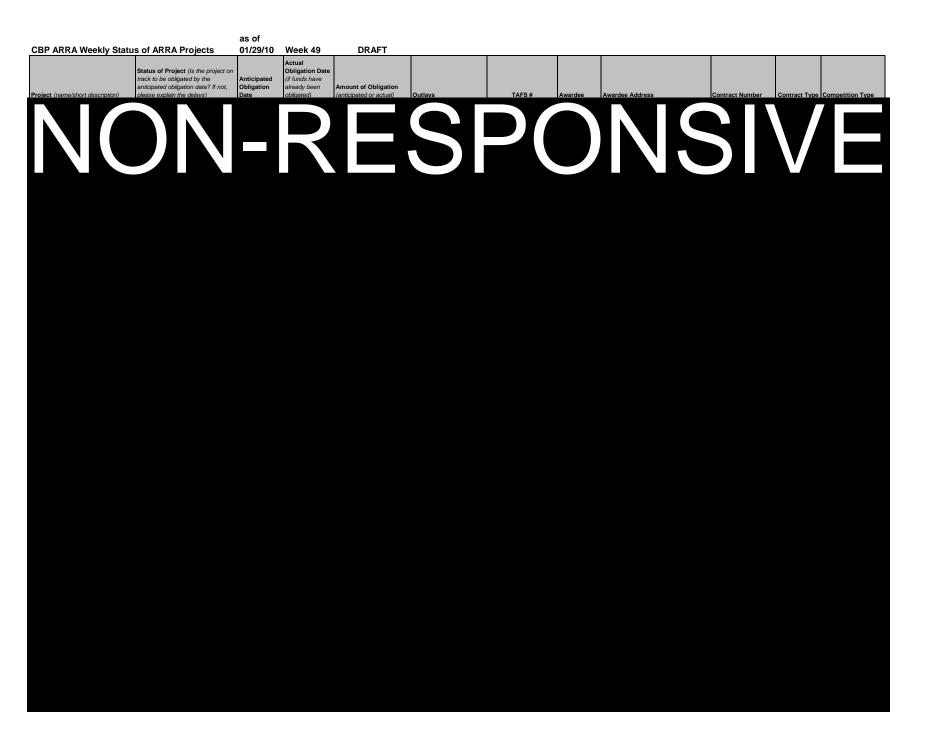

(b) (7)(E)

Hello (b)(6);(b)(7)(C)

On Nov 6, 209, SBInet provided a status on all of the open ARB open action items from the previous DHS ARBs and we reconciled our list against your list. All of the open items were closed except for CBP ID 43 and 73. I have attached the following:

- 1. SBI Closure Artifacts provided on Nov 6, 2009
- $2.\,$ The ADM the closes CBP IDs: 75, 76, 77 and 78
- 3. The CBP SBInet Action Item List

The APMD Status of ADM Action Items "Action Completed" does not reflect several of the SBInet closed actions.

The Summary I sent on Nov 6, 2009:

CBP ID	SBI ID ARB-13	Status Open - Under Review	Due Date 11/30/2009	File Name
49	ARRA-1	Closed	11/2/2009	49 - ADM Brief - Pilot Project Plan.ppt 65 and 72 - SBI Presentation to DHS ARB 21 May 09
65	ARB-2	Closed	5/11/2009	v8.ppt 65 and 72 - SBI Presentation to DHS ARB 21 May 09
72	ARB-3	Closed	5/11/2009	v8.ppt
73	ARB-7	Open	6/30/2010	
74	ARB-9	Closed	5/18/2009	74 - NB Final Letter Signed 5-18-2009.pdf

Subject: ACTION: GAO response RE: nPRS & Acquisition Decision Memorandum (ADM) Action Items

Importance: High

PMs,

Based on an ongoing GAO audit from fall 2009, GAO is requesting data from the four CBP Acquisition Programs involved (SBI, ACE, TECS Mod, WHTI). Your response is due Friday, 29 Jan.

The actions required are:

- 1. Provide Acquisition Decision Memorandum (ADM) Action Item updates for each of the programs (SBI, ACE, TECS Mod, WHTI)—The "official" tally of ADM action items is attached, page 2.
- 2. For action items that are late, provide a statement for each open action item explaining why required action has not been accomplished within the established timelines; what prevented the action from being accomplished within established timeline, when it will be completed; what is being done to ensure it will be completed—The "official" listing of overdue ADM action items is attached, page 3-5.
- 3. Provide an nPRS Report—please ensure that nPRS data is current, complete, and accurate. My staff will pull the report on Monday, Feb 01, and forward to APMD.

Please provide your responses (b)(6);(b)(7)(C), Cc addressee by 3:00 PM, Friday, 29 Jan. You staff should have been contacted by your program liaison to begin working this action. I am also available to answer any questions your may have.

SUBJECT: Secure Border Initiative Technology (SBInet) Program

Acquisition Decision Memorandum (ADM) Action Item Submittal

In accordance with the SBInet ADM dated September 6, 2009 that was promulgated subsequent to the DHS Acquisition Review Board (ARB) convened on June 22, 2009 to review the American Recovery and Reinvestment Act (ARRA) portions of the SBInet program, the SBInet Program Office has prepared a response to the following action item:

1. Action Item: The SBInet Program Office is to develop a pilot program to seek innovative solutions and promising technology applications for the Southwest border control problem.

Response: The SBInet Program Office (PO) developed the "SBI Innovative Technologies Pilot Program" presentation that addresses the SBI Operational Integration Division's (OID's) ongoing efforts to develop a pilot program to seek innovative solutions and promising technology applications to enhance border control along the Southwest border.

My staff is coordinating with (b) (6) to schedule a mini-ARB where the SBInet PO can present this presentation. In lieu of that, attached is a copy of the presentation to close out the above action item. If you have any questions, please contact me at (b) (6)

Chief,

I think it is unlikely that the details of this briefing, even if communicated from Appropriations staff to Judiciary Committee or personal staff, would change the likely lines of questions and answers on SBInet, which is not the sole focus of this hearing. I think it will come up, but not in great detail. I would be inclined not to push this additional information, especially on the eve of the hearing.

Despite this latest round of lobbying by Boeing, I would (if I were a member of Congress) focus on three points: (1) The SBInet program has repeatedly missed benchmarks; (2) we have little to show so far for the money spent; and (3) CBP recently granted a contract extension to Boeing. Why? I would suggest two points in response: First, CBP is for the first time establishing discipline over this program, which the last administration oversold. Second, we are evaluating all technology options going forward, including proven and less expensive stand alone solutions. I would avoid getting too much into the weeds on Boeings failures because it invites additional questions on why CBP recently extended the contract option.

Of course, I wasn't at the second session with you today, so I don't know how it played out. If you think we should send this additional information, I could certainly do so.

(b)(6);(b)(7)

What do you think the chances are that info as a result of this briefing will get passed on to any of the members of the Senate Committee that the Secretary will be testifying before tomorrow? She was briefed up on SBInet today and yesterday but this goes into more granularity that she may have or feel

comfortable with. Should we be providing this to her staff in order to prepare her if one of the Senators presses with some of this info?

Subject: RE: Narrative on SBInet you requested

Chief-

We had a very open and frank discussion with the Appropriations staffers from the House and Senate. I started by explaining that we were currently in a state of some flux and uncertainty. We were not yet prepared to go into SAT, based on concerns about outstanding issues we needed to resolve with system "fixes" before then. I told them I did not yet have a high-fidelity, high-confidence schedule, but that Boeing projected being able to start SAT in late January with initial government acceptance around April 21. I also noted that the Boeing schedule looked very optimistic to me and then initial acceptance could well slip a couple of more months.

As a result, they identified 42 fixes that would take several weeks to resolve (optimistically). I told them that I had rejected Boeing's suggestion that we defer some elements of SAT until after OT&E.

The staffers seemed entirely supportive of my position and reiterated the importance of "getting it right." I gathered from their expressions and body language that they had also heard from Boeing management—but they seemed wholeheartedly to agree with what we were saying.

I went on to say that, in my view, we were at a critical juncture and that we would have to evaluate whether or not it made sense to continue with this program in the way we have. I noted that, depending on what we decide, we needed to consider options up to and including contract termination. I also told them that I had had some initial dialog with senior management and that I expected to discuss program status with both CBP leadership this week, and probably the Secretary herself next week.

They asked about management support and I said that SBI continued to have very strong support from management in both CBP and the Department. However, I said that management was becoming increasingly frustrated with continued delays. I told the staffers that we were looking at options to restructure the program and perhaps to buy more "stand alone" technologies to provide more near-term capability. They understand that we will probably be making some key decisions—at least with respect to overarching philosophy—in the next days and weeks.

We explained that we are nearing completion of environmental analyses, that Boeing has already started ramping up their subcontract support, and that construction (actual earth-moving) should start in early January.

We also went over the status of the Northern Border (b) (7)(E) deployments, location by location. We noted that (b) (7)(E) was behind schedule about 30 days and (b) (7)(E) by about 45 days—but that we were making good progress and were optimistic about the plan going forward.

In general, the staffers were attentive and seemed philosophically in synch with us. They seem to support us looking again at the best way to move forward, at holding Boeing to high standards of performance, and in finding ways to get quicker capabilities to critical areas of the border.

Executive Director, Secure Border Initiative (SBI)

Subject: Narrative on SBInet you requested

Chief,

As you requested, I have attached a quick narrative to describe the current issues we are having with SBInet / Boeing. I'll also paste the text below my signature block in case you're checking via Blackberry.

SBInet Update and Status

ABSTRACT:

- SBInet deployment continues to experience technical problems and schedule delays
- First deployment to (b) (7)(E) is constructed and awaiting full testing
 - O Culmination of engineering testing, known as System Acceptance Testing (SAT), should have started by now but SBInet program office has not approved testing due to Boeing delays in checking out and accepting subcontractor hardware as well as delays in resolving outstanding technical issues
 - o It now appears SAT is not likely to begin before late January, although the schedule is still in review and uncertain
 - Assuming the system passes SAT, the Border Patrol will then conduct a formal Operational Test to confirm SBInet suitability and effectiveness to support the mission
- Second deployment to awaits completion of environmental review processes—planned imminently—after which construction will begin

DISCUSSION:

- Over the last year or so, SBInet has been testing the SBInet Block 1 system to ensure it works and to identify any remaining "bugs"
- Unfortunately, each new test has identified new problems which required further work
- Boeing, the SBInet contractor, has taken the position that the problems are relatively minor and can be handled with "workarounds" (basically, band-aids) pending some future analysis.
- The DHS/CBP SBI program office has disagreed and insisted on deliberative analysis of problems to ensure we understand root cause and have appropriate solutions in hand.
 - Boeing's past history is a contributor, since lack of deliberative and disciplined process has led to many of the past issues and delays.
 - Some examples:

 (b) (7)(E)

System Qualification Test (SQT) Phase 2 results: In order to test out fixes to earlier problems, Boeing conducted a Phase 2 SQT—which itself generated 243 new issues. Boeing felt that all of those could wait until *after* SAT and Operational Testing—but that is inconsistent with well-established program management processes. At SBInet program office insistence, Boeing and government engineers reviewed the list of 243 issues and concluded 42 required correction before SAT—which has created the latest set of schedule delays.

correction before SAT—which has created the latest set of schedule delays.

Subject: RE: House Homeland request

(b)(6):(b)(7)(C)

: Here's a quick look at the 47 items from SQT2 that we've agreed need to be fixed prior to SAT. We'll certainly want to package this differently to give to Last week (b)(6):(b)(7)(C) starting work on binning these into categories along with a top level description of each bin. We can probably have that done sometime Monday unless we need to make it a higher priority (we have several meeting scheduled with Boeing Monday morning on and SAT related topics).

Thanks

(b)(6);(b)(7)(C)

Hi, (b)(6);(b)(7)(0

I'll have to track down the details but we can certainly do that early next week. The 42 is an old number so it may be a bit difficult to recreate that exaxct list--but we should be able to meet the intent of the question.

I'm probably going to be the best POC, at least on Monday--I've pretty much blocked off my calendar to deal with this type of stuff.

(b)(6);(b)(7)(C)

I received an email from last night requesting additional information on the 42 issues that arose during the second SQT that Boeing is required to fix before SAT. I anticipate getting similar questions from our other usual POCs, and probably several other folks after 60 Minutes airs.

This by no means needs to be answered this weekend, but I at least wanted to make you aware. Also, since I know you'll be responding to a lot of media inquiries as well on Monday, I wanted to check and see if I should direct my questions to or if I should still send along to you?

Hope you're having a nice weekend!

Hi, (b)(6);(b)(7)(6)...

I just thought I should follow up to see what you need, if anything, from us.

We did have a small follow-up meeting, as I indicated below. We have sketched out a basic outline of a "plan of attack," which includes near-, mid-, and far-term activities.

Based on that sketch, we are starting to lay out implementation plans. In particular, we're laying out a preliminary strategy to get started on a formal Analysis of Alternatives for the long-term assessment. We've also generated a list of near-term candidates for technology investments (other than SBInet Block 1) that could fill immediate gaps along the Southwest Border by diverting about \$35M of ARRA funds that we had originally planned for SBInet Block 1.

As I understand note, you have the lead for pulling us all together for any follow-up review and status update. We'll be happy to support as required.

Best,

PMs.

Based on an ongoing GAO audit from fall 2009, GAO is requesting data from the four CBP Acquisition Programs involved (SBI, ACE, TECS Mod, WHTI). Your response is due Friday, 29 Jan.

The actions required are:

- 1. Provide Acquisition Decision Memorandum (ADM) Action Item updates for each of the programs (SBI, ACE, TECS Mod, WHTI)—The "official" tally of ADM action items is attached, page 2.
- 2. For action items that are late, provide a statement for each open action item explaining why required action has not been accomplished within the established timelines; what prevented the action from being accomplished within established timeline, when it will be completed; what is being done to ensure it will be completed—The "official" listing of overdue ADM action items is attached, page 3-5.
- 3. Provide an nPRS Report—please ensure that nPRS data is current, complete, and accurate. My staff will pull the report on Monday, Feb 01, and forward to APMD.

Please provide your responses (b)(6);(b)(7)(C), Cc addressee by 3:00 PM, Friday, 29 Jan. You staff should have been contacted by your program liaison to begin working this action. I am also available to answer any questions your may have.

Thanks

We are actually learning lessons about what will and won't work on the northern border, which was part of the plan for this project, only we had not expected to learn the lessons before we had the system up and running.

In one of the breaks that we had yesterday in dealing with all the activities surrounding the 12/25 incident, Haiti, and another hot button item, the Secretary and I had a chance to very briefly discuss SBInet, the 60 Minutes piece, and path forward. She is of the same opinion as we are: the 60 Minutes piece was a lot less negative than what we had anticipated and she also thought that Boeing took the brunt of the piece. She also stated that the purpose of the memo that went out with her directing the "review" of SBInet was in anticipation of a more negative piece. But basically she agrees with the options paper that we put forth before the holidays. She did not specifically identify option 2 as her preference but as she lined out her recollection of the memo and it fits right along with Option 2. She noted that she had "spoken to Congress" about this and that they were not surprised and supportive. I did not ask how this communication was done, formally or informally. Given the timeline from when we sent the paper forth I would guess that it was a verbal and informal.

This being the case we need to look at redesigning our thought process as to technology capability requirements (i.e, detection, deterrence, identification, classify, etc.. or mix of) that we would be looking to get resourced under this option. Exercising this option or something similar to it would mean that we would be weighting our resource procurement efforts and requirements towards "commodity purchases" of technology versus "system development". Not that we would stop the systems development completely (block one). I would ask that Border Patrol revisit our technology requirements against this new information.

Keep me apprised.

I don't know about talking points but this is an opportunity to do tech on border the right way. As gov, we were pretty pissed off about how DHS never consulted with state and locals. In general, we are trying to fix that. With regard to sbinet, yes, we intend to get input from as many points of view as possible. We would be nuts not to talk to these folks along the border to see what concerns they have and how technology could improve the situation. There is a lot of expertise down there. Getting that input would make the program better and build greater public support for deploying technology, which the Secretary believes is critical to controlling the border.

Hi (b)(6);(b)(7)(0

I believe you are setting up a meeting to discuss the SBInet review, but asked me to follow up with you on a particular issue. We received the summary below from IGP and were surprised to see that state and locals were told they would have the opportunity to provide input – particularly those that are not in Arizona.

We were not aware that this was part of the talking points and are concerned that this is raising expectations among our state/local stakeholders.

Thanks.

For your awareness, I provided the notes below on our Friday meeting with (b)(6);(b)(7)(C) to the Chief in preparation for his component's meeting tomorrow morning. I also had a brief chance to fill him in verbally. He is still a little concerned about the outreach to state and local (ie made an analogy to the checkpoints) and may try to talk to a little more about that aspect. I did tell him that I thought we were pretty much on the same page with Dept on the other issues.

SBInet

For Your Info Only:

- Per S1 direction, (b)(6);(b)(7)(C) held a meeting with CBP, S&T and DHS Management to discuss the plan to review the future of the SBInet technology program.
- The purpose of the review is to drill down on the four options in the December 16, 2009 memo from to S1. The goal is to get the right capabilities to the right places as quickly as possible.
- It was recognized the first option (status quo) and the fourth option (discontinue/delay) are probably out, but the focus should be on option 2 (CBP's recommendation) and option 3.
- Next week CBP, S&T and DHS Management will convene to set up a subcommittee to discuss roles, goals, timelines and output.
- It was discussed by all that the recommended solution has a clear linkage to Operational Requirements Documents (ORD), and a more robust Analysis of Alternatives.
- S1 office would like us to involve stakeholders in some way such as border sheriffs, mayors, county supervisors, GAO, IG and the Hill, etc. This does not need to be a formal complex outreach plan i.e. could be phone calls; not town hall meetings or hearings.
- Once the most effective strategy is identified and approved, DHS will provide the necessary cover for that future direction. CBP should not feel bound by past constraints.
- Short Term Stimulus funding issues may need to be worked on a separate, more expedited. Specifically, if we don't have a viable/verifiable plan in the next one to two weeks, it may be time for DHS/CBP to consider reprogramming some of those funds for more pressing needs.

Subject: RE: House Homeland request

: Here's a quick look at the 47 items from SQT2 that we've agreed need to be fixed prior to SAT. We'll certainly want to package this differently to give to to categories along with a top level description of each bin. We can probably have that done sometime Monday unless we need to make it a higher priority (we have several meeting scheduled with Boeing Monday morning on and SAT related topics).

Thanks

Hi, (b)(6):(b)(7)(0

I'll have to track down the details but we can certainly do that early next week. The 42 is an old number so it may be a bit difficult to recreate that exact list--but we should be able to meet the intent of the question.

I'm probably going to be the best POC, at least on Monday--I've pretty much blocked off my calendar to deal with this type of stuff.

(b)(6);(b)(7)(C)

I received an email from (b) last night requesting additional information on the 42 issues that arose during the second SQT that Boeing is required to fix before SAT. I anticipate getting similar questions from our other usual POCs, and probably several other folks after 60 Minutes airs.

This by no means needs to be answered this weekend, but I at least wanted to make you aware. Also, since I know you'll be responding to a lot of media inquiries as well on Monday, I wanted to check and see if I should direct my questions to **(b)**, or if I should still send along to you?

Hope you're having a nice weekend!

Hello(b)(6);

On Nov 6, 209, SBInet provided a status on all of the open ARB open action items from the previous DHS ARBs and we reconciled our list against your list. All of the open items were closed except for CBP ID 43 and 73. I have attached the following:

- 1. SBI Closure Artifacts provided on Nov 6, 2009
- 2. The ADM the closes CBP IDs: 75, 76, 77 and 78
- 3. The CBP SBInet Action Item List

The APMD Status of ADM Action Items "Action Completed" does not reflect several of the SBInet closed actions.

The Summary I sent on Nov 6, 2009:

CBP ID	SBI ID	Status	Due Date	File Name
43	ARB-13	Open - Under Review	11/30/2009	
49	ARRA-1	Closed	11/2/2009	49 - ADM Brief - Pilot Project Plan.ppt 65 and 72 - SBI Presentation to DHS ARB 21 May 09
65	ARB-2	Closed	5/11/2009	v8.ppt
				65 and 72 - SBI Presentation to DHS ARB 21 May 09
72	ARB-3	Closed	5/11/2009	v8.ppt
73	ARB-7	Open	6/30/2010	
74	ARB-9	Closed	5/18/2009	74 - NB Final Letter Signed 5-18-2009.pdf
75	ARB-17	Closed	2/11/2009	75-76-77-78 SignedSBINetADM02 11 09.pdf
76	ARB-18	Closed	2/11/2009	75-76-77-78 SignedSBINetADM02 11 09.pdf

Subject: ACTION: GAO response RE: nPRS & Acquisition Decision Memorandum (ADM) Action Items

Importance: High

PMs,

Based on an ongoing GAO audit from fall 2009, GAO is requesting data from the four CBP Acquisition Programs involved (SBI, ACE, TECS Mod, WHTI). Your response is due Friday, 29 Jan.

The actions required are:

1. Provide Acquisition Decision Memorandum (ADM) Action Item updates for each of the programs (SBI, ACE, TECS Mod, WHTI)—The "official" tally of ADM action items is attached, page 2.

- 2. For action items that are late, provide a statement for each open action item explaining why required action has not been accomplished within the established timelines; what prevented the action from being accomplished within established timeline, when it will be completed; what is being done to ensure it will be completed—The "official" listing of overdue ADM action items is attached, page 3-5.
- 3. Provide an nPRS Report—please ensure that nPRS data is current, complete, and accurate. My staff will pull the report on Monday, Feb 01, and forward to APMD.

Please provide your responses (b)(6);(b)(7) Cc addressee by 3:00 PM, Friday, 29 Jan. You staff should have been contacted by your program liaison to begin working this action. I am also available to answer any questions your may have.

Secure Border Initiative

SBI Innovative Technologies Pilot Program

(b) (6)

Acting Deputy Director SBI Operational Integration Division

October 2009

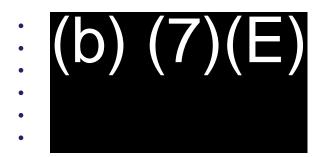

U.S. Customs and Border Protection

Introduction

- The SBI Operational Integration Division (OID) is currently developing a pilot program to seek innovative solutions and promising technology applications to enhance border control.
- The purpose is to deliver capabilities to the operators in the field, provide them with the opportunity to give feedback, and to continually improve the SBI toolkit.
- SBI OID released a series of Request for Information (RFIs) in order to determine if government or commercial (GOTS/COTS) products were available to meet operational needs within the following categories:

Project Pilot Scope

- Funding to support this effort will primarily come from Border Security, Fencing, and Information Technology (BSFIT)
- Selection Criteria:
 - Each commodity buy will be relatively inexpensive (approx. (b)(3) or less)
 - Within BSFIT scope
 - Small businesses preferred
 - · Begin initial purchases by the end of CY09
 - · Cross-component impact preferred
 - Multiple Vendors preferred
- SBI OID will coordinate with vendors for demonstrations of promising technology options and work with the acquisition office to procure items for use in the field. OID, in conjunction with the operating components, will establish a deployment plan to the southwest border and conduct an operational evaluation of all items procured.
- SBI Commodity Buy Process
 - Operator Facilitation
 - Market Research
 - Selection Evaluation
 - Procurement
 - Operational Field Evaluation

Current Project Status

Commodity Purchases / Under Consideration

- (b) (7)(E)
 - Options Identified
- (b) (7)(E)
 - · Options Identified
- (b) (7)(E)
 - · Research conducted, selection pending
- (b) (7)(E)
 - Options expensive/out of scope-coordinating next steps with the (b) (7)(E)
 Working Group
- (b) (7)(E)
 - · Research conducted, selection pending
- (b) (7)(E)
 - Handled as a separate effort with OBP, research conducted
- (b) (7)(E)
 - (b) (7)(E)
- Agriculture and Trade
 - · Options identified, pursuing GSA procurement

Proposed Timeline

7/17 – User Working Group: brainstorm list of potential items

7/23 – Component reps briefing/prioritization lists

7/31 – Reviewed prioritized "wish list"

8/1-9/30 - Conduct Market Research

10/14 – Identify Operationally Valid Options and targeted potential vendors for each commodity

11/1 – Release procurement announcement's)

12/1 - Execute initial procurements*

*Procurements will continue through January

Cost/Budget

 Total budget for this effort remains the discretion of the SBI, Executive Director and has not yet been defined.

Potential SBInet ARRA Funding Alternatives

Plan: SBInet intends to spend up to \$35M on Long Lead Items;

Backup Plan: If the schedule to procure these long lead items slips the program may choose to use ARRA funds to:

- Expand the scope of this Program Pilot effort to explore and evaluate additional technologies or
- Buy additional operationally viable products requested by the Office of the Border Patrol.

Subject: Re: SBInet Follow-ups

Delays are caused by our commitment to review the quality and effectiveness of the system. As we have reported before, we had a number of technical issues we identified with the system as a resulting of testing over the last year. Although we did not feel any of the issues were "show-stoppers," we did feel it prudent to address each of them very deliberatively and comprehensively. As a result, we took the time to do full-engineering analysis, design corrections, and fully test the corrections. We've completed most of that, but it has taken time. It has also impacted the design of future testing--including the System Acceptance Testing and ultimately the Border Patrol's operational testing. We have to accommodate the system corrections into the detailed test planning, which is a comprehensive and time-consuming effort.

We specifically chose NOT to take excessive short cuts, which might have made the near-term schedule appear better but would likely have created new delays in the future.

To mitigate the delays, we are now working with Boeing so that we can use the "as is" system over the next few months, even before we do the extensive testing. In that way, we can get most of the operational benefit we would have gotten if we had been able to maintain the schedule, while still protecting the government equities to esnure we don't fully accept the system until we are ready.

Work does continue.

With respect to delays, we've said a MINIMUM of three months--which would be April. We don't have the final schedule yet because we have a variety of options that we're trading against risk and benefit. We expect to lock down the schedule in the next couple of weeks.

To:

Subject: If I were in your shoes what would I think about Date: Thursday, January 14, 2010 5:30:22 PM

This is just my two cents, I have been reluctant for a number of reasons to provide before, but I have held back too long. You have tough decisions to make, and while they are your decisions I hope others perspectives might assist you in forming your own path forward.

You came into a program in bad shape. You have put your heart and sole into improving the process and gaining an acceptable system for your customer. However, since you seem to like analogies, you have been trying to teach a pig to sing. All that has been accomplished is irritating the pig, it still cannot sing, and has no desire to sing. I want to be sure however, to make sure you know the problem is wider than just the prime contractor.

Significant amounts of funds have been put against this SBInet endeavor. And although the SBInet product is not what was expected, it does have some capability that will be useful to our customer. As you have noticed, the rate of uncovering problems continues to be greater than the rate of solving those problems, even considering the many that are agreed to be ignored. There are still several major steps before we can accept the system.

(b) (7)(E) and even incremental steps toward a real solution has value. The problems that exist are in two categories, cleaning up paperwork and real changes to system required.

If I were in your shoes there are several options worth considering.

- 1. Stop everything and decide if another attempt should be made
- 2. Continue deployment effort for (b) (7)(E) and stop everything else and decide if another effort should be made
- 3. Decide Boeing is our partner and reevaluate how we are approaching improving the quality of the product provided.

Options 1 and 2 are just slight variations on the theme of cutting losses and starting over. Canceling SBInet for the convenience of the government stops the hemorrhage of funds with little progress. It however provides no capability for the spend dollars. The question of "is the SBInet that has been produced worth operating and maintaining" needs answering. Now we cannot even get in to the test event to evaluate the capability. Boeing has little incentive to make progress, because they fear this is the end and no fee is better than no program. If the path to is to get (b) (7)(E) deployed, I would recommend picking a date this spring at the latest, and telling Boeing the test will commence on this date. Results of this test will decide if SBInet is cancelled or just future work cancelled.

Option 3, reaffirms that Boeing is our trusted supplier, but requires totally changing the management approach taken. The theory has been for many years that quality of a product is 85% management. Management on both the government and Boeing side must take responsibility for the quality of the effort thus far, and change so the quality of future effort is

high. Today's management accepts responsibility, but does not push responsibility to the working level. The working level is disenchanted, because so many decisions are made at the upper levels of management without input. There is too much backroom negotiations on what to do and how to pass. Too little on how to make this a quality product and make the process repeatable. We have trained Boeing that poor quality is acceptable for schedules sake. Basic contract management is not well executed.

Most of this is self obvious. The possibility of stopping work, while using the using the maintenance Task Order to fix the remaining problems. Why do we need acceptance testing if we are going to stop work, if we are not going for a production decision?

SBInet is not that complicated. Many vendors should be able to construct and deploy SBInet towers and stations.. A separate product improvement program will be more effective than one run by a large prime. Use Boeing where they are good, and stop using them where they are just expending funds.

While I am deeply familiar with effort on SBInet Block 1, and somewhat familiar with and (b) (7)(E) I have no visibility into Northern Border or other projects. I do recommend stopping everything you can, and holding a stand down for CMMi training. If we want to hold our contractor to CMMi level 3, then the program office should be held to the same standard.

I would gain approval of your plan, because it is obvious Boeing will attempt to make this your fault not theirs. I think you have sufficient documentation to show otherwise.

I hope this is helpful, if not the trash can is near by. Sorry it is longer than I wanted. I will keep on pressing forward at the working level.

Just to follow up -

I spoke to both House Homeland majority/minority, and gave the high-level update that we discussed regarding the items that needed to be fixed prior to SAT (b) (7)(E) as two biggies, but mostly just procedural corrections), and the reasons behind the extension of SAT.

A few things that did come out of the phone calls:

- Majority staff is still interested in getting a high-level summary at some point of the SQT issues, but it is not as pressing.
- Minority staff indicated that a letter would be forthcoming (addressed to S1) requesting more information on the "DHS review" -- and likely a general dissatisfaction/frustration with the continued delays (i.e., why do these issues continue to pop up/why are they not discovered sooner).
- Potential date for SBInet hearing March 18.

Senate Homeland had the Secretary testifying this morning and staff have been pretty much unreachable over the past couple weeks, so I'll give them a call tomorrow morning and let you know how those calls go.

From: (b)(6);(b)(7)(c)

Sent: Thursday, June 04, 2009 10:11 AM

Cc: (b)(6); (b)(7)(c)

Subject: SBInet ARB Recap

Program Managers,

The following is a recap of the SBI*net* ARB, which was the first presented to (b)(6);(b)(7)(c) I passed my comments to (b)(6);(b)(7)(c) , and he added depth from the perspective of "man in the seat".

This ARB was Informational; SBI*net* met a Decisional ARB, chaired b (b)(6);(b)(7)(C) DHS/USM, on 21 May, and received an Acquisition Decision Memorandum on 26 May.

The ARB was scheduled for 1 ½ hours. Although this was an Acquisition forum, were quite broad and extended well beyond just acquisition. Some of that may be due to the fact this was the first ARB and her first opportunity to set a tone. However, she was also genuinely interested in

understanding the "substance" of the program, outside of acquisition processes...operating environment, terminology, concepts of operation, benefits, relative costs, technology, etc. Her questions drilled down to the third and fourth level of indenture, which spawned further questions from the staff.

The Deputy Secretary asks a LOT of questions, and they range from very broad to very detailed. In most cases, they really WERE questions and she was interested and attentive to the answers. She clearly tried hard to understand the answers—she listened carefully and thought about what she heard. She worked hard to get beyond specific words and to the actual intent of the answers. It appears that our briefers should feel free to provide answers to questions and to defend them. The Deputy Secretary appears willing to be convinced by a good explanation or argument. And in cases where she doesn't agree with the briefer's conclusions, she still seems to appreciate conclusions that are based on thought and rationale argument.

(b)(6);(b)(7)(C) is very quick, which suggests it would be folly for any briefer to "fake" an answer.

the requisite skills in adequate depth, breadth, and quantity. She perceives industry as trying to sell us more than we need and is interested in our ability to weigh capability against the validated requirement.

taken for granted. For example, she asked about the appropriate use of terms like "force multiplier versus force enabler" and "commodity"—and then challenged our use of them. In doing so, she made clear she was not trying to be confrontational—instead, she wanted to make sure everyone understood how SHE interpreted the word when she saw it. She commented on distribution markings on charts and asked why they were there, and if they were used properly. Briefers should be prepared to explain the use of any word on a chart or in a statement.

The Deputy Secretary was equally able to drill into technical details. She can quickly connect information from multiple charts to identify seeming inconsistencies, and then ask about them. For example, the SBInet briefing referenced the fact that we accommodated (b) (7)(E). In a later chart, where we discussed predicted system performance, she noticed we didn't count the contribution of those (b) (7)(E) and she asked a number of questions about why we handled things that way.

In short, briefers should be able to explain why they have made the conclusions and decisions they have made—and the rationale needs to be sound. Briefers should understand that questions—at least within the SBInet ARB, they were NOT purely rhetorical. And briefers should be able to explain word choices on charts or in verbal statements—clarity of communication and common understanding of meanings are very important.

At the conclusion of the 1 ½ hour session 21 of the fifty slides were briefed. The takeaway is...in addition to being prepared to present your programs for an Acquisition Decision Event, be as prepared for an indepth discussion of the history, context, inter-relationships, and relevance of your program as the Deputy Secretary spins up on our programs.

Respectfully,

Boeing's SBInet project under fire again

Napolitano says electronic fence has 'unacceptable delays'

Homeland Security Secretary Janet Napolitano has ordered a reassessment of the \$8 billion SBInet virtual border fence program in Arizona after another round of delays in the program, an official confirmed today. Boeing Co. is the prime contractor on the project.

SBInet is an electronic surveillance system composed of cameras, radars and other sensors strung on towers and coordinated with other sensor systems, communications and command and control networks. U.S. Customs and Border Protection recently has been deploying a 23-mile segment of the system near Tucson, Ariz.

Napolitano requested the SBInet reassessment Jan. 8 after an internal evaluation revealed "unacceptable delays" in the program, according to a Jan. 11 e-mail message from Napolitano provided today by Matthew Chandler, a Homeland Security Department spokesman.

Although the message did not state the extent of the delays, the **Seattle Times** recently reported that the initial operational segment, known as Tucson-1, would be three months late in beginning operation. Instead of beginning operation at the end of 2009, the operation has been delayed to March 2010, the newspaper said. Napolitano indicated in her message that SBInet continues to fall short of expectations.

"Americans need border security now — not 10 years down the road. I am committed to ensuring that our border security programs are timely and cost-effective," Napolitano wrote.

"This fall, due to my ongoing concerns about SBInet, I directed the acting commissioner of U.S. Customs and Border Protection to evaluate its implementation. As his analysis uncovered unacceptable delays, last Friday I ordered a department-wide reassessment of the program to consider options that may more efficiently, effectively and economically meet our border security needs,"

Napolitano wrote.

Mark Borkowski, project manager for the Secure Border Initiative, which includes SBInet and other fencing programs, told Federal News Radio recently that the next segment of the project, Ajo-1, will be built as scheduled, but Boeing will not begin any new work until the reassessment is completed.

Boeing got the initial SBInet contract in September 2006, and first built an 18-mile prototype of the system near Sasabe, Ariz. The border patrol has been using that prototype segment in its daily operations to protect against border incursions since it was accepted by DHS in February 2008. Borkowski a year ago <u>said the system</u> <u>was undergoing additional testing</u> before permanent construction would begin.

(b)(6);(b)(7)(C)

Thanks for your message.

I would like to spend an hour with you before we get too far down the path.

Given your extensive knowledge, that would be helpful.

I have scheduled a couple of pre-meetings, one with the MGMT chiefs this morning and one with OLA, IGP and OPA, to make sure there is general visibility in the various offices that have a nexus to the work.

Look forward to working with you.

I just thought I should follow up to see what you need, if anything, from us.

We did have a small follow-up meeting, as I indicated below. We have sketched out a basic outline of a "plan of attack," which includes near-, mid-, and far-term activities.

Based on that sketch, we are starting to lay out implementation plans. In particular, we're laying out a preliminary strategy to get started on a formal Analysis of Alternatives for the long-term assessment. We've also generated a list of near-term candidates for technology investments (other than SBInet Block 1) that could fill immediate gaps along the Southwest Border by diverting about \$35M of ARRA funds that we had originally planned for SBInet Block 1.

As I understand note, you have the lead for pulling us all together for any follow-up review and status update. We'll be happy to support as required.

SBI*net*Southern Border Project Update

January 8th, 2010

U.S. Customs and Border Protection

Status

(b) (7)(E)

(b) (7)(E) Field Construction

- Completed (b) (7)(E) integration and checkout
- Completed (b) (7)(E) Characterization
- Govt Inspection closure 1000 of 1004 completed

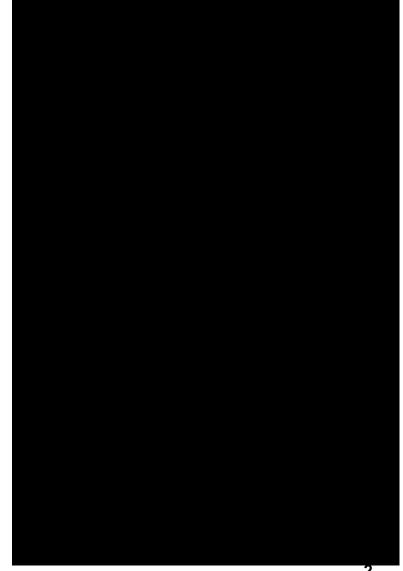

Issues and Concerns

- Final Acceptance behind schedule due to issues including:
 - CISCO/VSOC issues

 - Software changes/fixes as a result of SQT 2
 - Acceptance test procedures and tower functional checkout procedures still ongoing

Look ahead - Next 90 Days

- Finalize test procedures
- Finalize remaining schedule to Acceptance

• (b) (7)(E) Accomplishments

- Received the Findings of No Significant Impact Statement (23 Dec)
- Received Special Use Permit (b) (7)(E)
) and Right of Way for construction (BLM).
 - Awaiting compatibility determination from (b) (7)(E)
- Conducted Deployment Readiness
 Review on December 2nd.

Concerns

- Closure of the RAT design
- Obtain GSA approval to (b) (7)(E)
- (b) (7)(E) construction schedule encroaching on Pronghorn Fawning Season
 - Additional BMPs and measures required

Look Ahead - Next 90 days

- Receive land use permits
- Conduct CRR
- Start (b) (7)(E) onstruction

(b) (7)(E) Status

• (b) (7)(E)Accomplishments

 Completed Supplemental EA Public Review, now in internal SBInet review

Issues and Concerns

- (b) (7)(E)
 working through landowner issues
- SST and SST combo design approval not final

Look Ahead – Next 90 days

- Work on real estate effort
 - Conduct Metes and Bound Surveys
 - Perform Land appraisals
- Conduct (b) (7)(E) design TIM
- Conduct Design TIM
- Conduct (b) (7)(E)
 (b) (7)(E)
- Work design drawing package from 60% to 95%

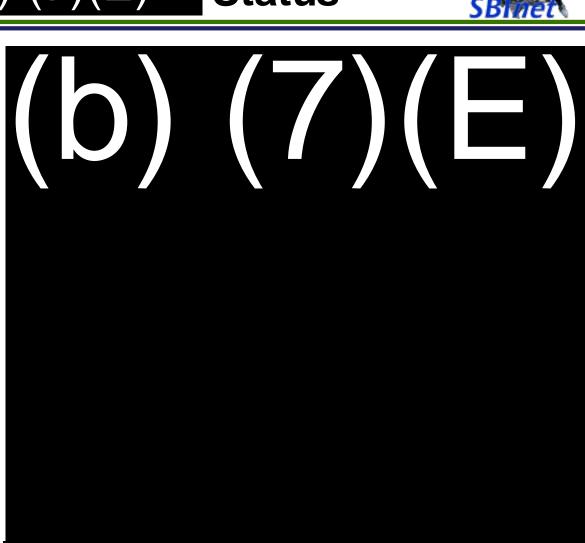

Status

(Acquisition Strategy) Review for Monday, January 25, 2010

(b)(6);(b)(7)(c)

The SBI Systems Engineering Directorate and SBI Contracts Branch would like to conduct the JHU/APL Gold (Acquisition Strategy) Review electronically on Monday, January 25, 2010. The JHU/APL Gold Review is for a follow-on IDIQ contract that provides support the SBI Systems Engineering Directorate for technical analysis and research for SBInet testing and evaluation activities. **The current JHU/APL contract ends on February 28, 2010.**

The electronic Gold Review process would be as follows:

- 1. The advisors will be sent the documentation electronically today. (b)(6);(b)(7)(c) will be provided a hardcopy binder for their review tomorrow.
- The advisors will have until COB Friday, January 22, 2010 to review and make their recommendation
- 3. AMD will consolidate the inputs and provide them to (b)(6);(b)(7)(c) for a decision on Monday, January 25, 2010.
- 4. AMD has verified the entrance criteria for the Gold Review has been met.

Note: Although the execution of the review board will be done electronically; advisors are encouraged to make phone calls or meet face to face (if necessary); as long as they are able to provide their input to AMD by COB Friday, January 22, 2010.

Please advise if you are agreeable to the recommended sequence for this Gold Review.

Date:Friday, January 15, 2010 5:27:36 PMAttachments:Issue Paper Pd and Pid v2 0 (2).doc

Attached is the issue paper relating to the changes in probability of detection and probability of identification reported by Boeing at the JPMR this week.

As you are aware, the Department is taking a close look at the SBInet and will make a determination at some point whether to continue with these deployments. During the last two months, the schedule to turn the system over to Border Patrol slipped from a date in January 2010 to the current estimate of October 5, 2010. The negative information could potentially jeopardize the program's continued existence.

Subject: Change in Key Performance Parameters for (b) (7)(E)

During the JPMR for SBInet today, we were told

(b) (7)(E)

While there is still some work that needs to be

done to verify these numbers,

(b) (7)(E)

With the current attention being given to SBInet at the Department and the assessment to determine if we will deploy more iterations of Block 1 technology on the southwest border, this could prove to be a significant development especially in light of the latest schedule which has the system not being turned over to us for testing until October 5. That has slipped in the last two months from a January system acceptance date.

There were several representatives from DHS present at the JPMR who are charged with acquisition overview for the Department. They have likely relayed this information up the chain.

(b)(6);(b)(7)(C)

SITUATION:

- At the January 13, 2010, SBInet Joint Project Management Review
 (JPMR) Boeing revealed a potential change to projected estimates of the (b) (7)(E)
- Boeing claims a mistake was made in their presentation of clearly defining the results.

• Key terminology Defined:

- (b) (7)(E)

 procedure to measure the
 (b) (7)(E)

 (b) (7)(E)

 standard test
 (b) (7)(E)

 standard test procedure to
- Key Performance Parameters (KPP): identified as the program's critical essential characteristics or capabilities.
- Threshold Value the minimum acceptable value to meet contractual obligations.
- Objective Value goal Boeing is trying to meet.
- In previous JPMRs Boeing had stated that (b) (7)(E) percent respectively, which were determined through modeling and analysis.
- At the JPMR on January 13, 2010, Boeing presented projected (b) (7)(E)
- These lowered numbers alarmed SBI and OBP officials attending the meeting. Boeing representative could not adequately explain how the lower percentages were obtained.
- DHS S&T representatives were in attendance.
- The SBInet Operational Requirements Document (ORD) states in the Key Performance Parameters (KPP) that the objective value (target) to (b)

ACTIONS TAKEN:

- 1. After the JPMR all parties started investigating the issue.
- 2. Boeing is putting together a tiger team to review the data presented at the JPMR.

OUTCOMES OF ACTIONS TAKEN

1. Initial investigation revealed the following:

The original percentages of (b) (7)(E)

Prepared by: (b) (6)

Subject: Potential Operational Impact of (b) (7

Date of last Revision: January 15, 2010

- o The were based on an actual characterization test conducted by Boeing in the field for only a small segment, (b) (7)(E)
- Boeing believes their field characterization was not a complete analysis and cannot be used to judge the future performance of the system. In order to compare the predictive model analysis numbers a complete field characterization test would have to be completed covering the entire area (b) (7)(E)
- 2. There have been no actions taken to date by the tiger team.

CHALLENGES:

- If accurate, these revised numbers could represent a (b) (7)(E)
- Anv (b) (7)(E)
- RISK Until the true capabilities of this system are understood, through test and evaluation, operational impacts may not be fully evaluated.
- Boeing anticipates that an actual field characterization of the entire area (b) (7)(E) will be very near their model prediction analysis estimations of (b) (7)(E)

OPTIONS:

- 1. Study the issue more and aggressively investigate this occurrence to ensure it is not a symptom of a larger problematic issue.
- 2. Wait for Systems Acceptance Testing (SAT) to begin in July 2010 and see what actual (b) (7)(E) percentages are recorded.

RECOMMENDATIONS:

1. Study the issue more and aggressively investigate this occurrence to ensure it is not a symptom of a larger problematic issue.

Chief--

FYSA, S1's staff has scheduled a meeting for Friday afternoon, presumably tpo frame out the review.

Also--if we ever get an opening to get DHS to loosen the shackles and let us continue our communications strategy (which, by the way, is a big part of the reason the 60 Minutes thing was not so bad), we will all be better off. As it stands, DHS is making us refer everything to them--and I'm concerned it's going to destroy the relationships we've established, compromise our credibility, create misinformation (due to lack of detailed knowledge), and broken glass we'll end up cleaning.

I obviously wouldn't tilt at windmills just yet--but if the opportunity presents itself...

In one of the breaks that we had yesterday in dealing with all the activities surrounding the 12/25 incident, Haiti, and another hot button item, the Secretary and I had a chance to very briefly discuss SBInet, the 60 Minutes piece, and path forward. She is of the same opinion as we are: the 60 Minutes piece was a lot less negative than what we had anticipated and she also thought that Boeing took the brunt of the piece. She also stated that the purpose of the memo that went out with her directing the "review" of SBInet was in anticipation of a more negative piece. But basically she agrees with the options paper that we put forth before the holidays. She did not specifically identify option 2 as her preference but as she lined out her recollection of the memo and it fits right along with Option 2. She noted that she had "spoken to Congress" about this and that they were not surprised and supportive. I did not ask how this communication was done, formally or informally. Given the timeline from when we sent the paper forth I would guess that it was a verbal and informal.

(b)(6);(b)(7)(C)

This being the case we need to look at redesigning our thought process as to technology capability requirements (i.e, detection, deterrence, identification, classify, etc.. or mix of) that we would be looking to get resourced under this option. Exercising this option or something similar to it would mean that we

would be weighting our resource procurement efforts and requirements towards "commodity purchases" of technology versus "system development". Not that we would stop the systems development completely (block one). I would ask that Border Patrol revisit our technology requirements against this new information.

Keep me apprised.
